Part Number 80683

©2010, 2003, 2000 by B&M Racing and Performance Products

The **B&M QuickSilver Shifter** can be used in most vehicles equipped with three speed or four speed automatic transmissions. Your **B&M QuickSilver Shifter** comes equipped with a neutral safety switch and a backup light switch, transmission brackets, levers and a five foot shift cable. Optional shifter cables in 2 ft. (#80830), 3 ft. (#80831), 4 ft. (#80831), 8 ft. (#80831), 10 ft. (#80835) and 12 ft. (#80836) are also available. To use the **B&M QuickSilver Shifter** with the Ford AOD transmissions you will need the optional accessory kit #80496. To use the **B&M QuickSilver Shifter** with the GM 4L60E, 4L60E, 4L80E, and 4L85E equipped with a PRNDL switch you will need optional accessory kit #75498 otherwise you can use the supplied GM bracket.

To use this shifter with a GM four speed automatic transmission, you will need to remove the three speed limiter blocker pin and the two e-clips (See **Figure 1**). For the Ford AOD four speed transmissions do **not** remove this blocker pin.

To use this shifter with a Ford or Chrysler automatic transmission, install the blocker pin and the two e-clips (See **Figure 1**). This limiter limits the travel of the shifter when it is shifted into Park, so that it does not stretch the cable.

Please read the instructions and review the illustrations thoroughly before beginning the installation.

The mechanical components of this shifter are precision made and assembled at our factory. Any modification or disassembly of these parts can cause the shifter to malfunction and will void the warranty. You should disassemble only those items outlined in the instructions.

The vehicle should be about 2 feet off the ground for ease of installation. Use jack stands, wheel ramps or a vehicle lift. Make sure the vehicle is firmly supported before attempting to work on it.

**IMPORTANT:** If your vehicle is equipped with a locking steering column. Securing the column lock lever in the engine compartment in the full up position will allow the steering wheel to be locked and unlocked and the ignition key to be removed.

**WARNING:** This allows the steering wheel to be locked **WHENEVER** the ignition key is turned to the "lock" position **WHILE THE VEHICLE IS MOVING, OR AT ANY OTHER TIME.** Securing the steering column lock lever in any other position will both **PREVENT** the steering wheel from locking and the removal of the ignition key.

## INSTALLATION

**NOTE:** If you are installing this shifter with a GM four speed automatic transmission, you must remove the three speed limiter blocker pin and the e-clips indicated in **Figure 1**. Removing this blocker pin gives the shifter four forward positions rather than three. For Ford AOD four speed automatic transmissions and Chrysler A-500 and A-518 four speed automatic transmissions do **not** remove this blocker pin, since these transmissions have only three forward positions. Also do **not** remove the blocker pin and the e-clips for any three speed automatic transmissions. (The three speed limiter blocker pin goes in the upper of the two holes at the rear of the shifter).

If you are installing this shifter with a Ford or Chrysler three or four speed automatic transmission you must install

the Park limiter blocker pin and the e-clips as also indicated in **Figure 1**. This limiter limits the shifter travel into the Park position, since Ford and Chrysler transmissions have less travel between Reverse and Park than GM transmissions do.

**STEP 1.** Remove the stock shift linkage; **Column Shifters:** Remove all rods, levers or cables from the column and the transmission. Place the column shift lever in Park position. Remove the pin holding the shift lever in the column and remove the lever assembly. If your vehicle is equipped with a locking steering column, secure the column lock lever in the full up position. **WARNING:** This allows the steering wheel to be locked and the ignition key removed **WHENEVER** the ignition key is turned to the "lock" position **WHILE THE VEHICLE IS MOVING, OR AT ANY OTHER TIME.**

**Console Shifters:** Remove the shifter mechanism from the console. Disconnect the rod or cable from the transmission. Remove the cable bracket if equipped. If there is a cable or linkage from the console shifter or transmission to the steering column lock, it must be blocked in the Park position as described above.

**NOTE:** Shifter installation may require console modification or complete console removal depending on the space available in your vehicle.

**STEP 2.** Pull the carpet away from the floorboard where the shifter is to be mounted. If the vehicle has a bench type seat, move the seat to the full forward position. Place the shifter on the floor with the stick shifted to the rearmost position. Locate the shifter for ease and convenience of operation. (The rear mounting
