 intervention materials for elementary students who are struggling in math Are you hungry for effective instructional  
 strategies that will address students conceptual gap in additive and multiplicative math problem solving Are you searching  
 for a powerful and generalizable problem solving approach that will help those who are left behind in meeting the Common  
 Core State Standards for Mathematics CCSSM If so this book is the answer for you The conceptual model based problem  
 solving COMPS program emphasizes mathematical modeling and algebraic representation of mathematical relations in  
 equations which are in line with the new Common Core Through building most fundamental concepts pertinent to additive  
 and multiplicative reasoning and making the connection between concrete and abstract modeling students were prepared to  
 go above and beyond concrete level of operation and be able to use mathematical models to solve more complex real world  
 problems As the connection is made between the concrete model or students existing knowledge scheme and the symbolic  
 mathematical algorithm the abstract mathematical models are no longer alien to the students As Ms Karen Combs Director of  
 Elementary Education of Lafayette School Corporation in Indiana testified It really worked with our kids One hallmark of  
 mathematical understanding is the ability to justify why a particular mathematical statement is true or where a mathematical  
 rule comes from <http://illustrativemathematics.org/standards> Through making connections between mathematical ideas the  
 COMPS program makes explicit the reasoning behind math which has the potential to promote a powerful transfer of  
 knowledge by applying the learned conception to solve other problems in new contexts Dr Yan Ping Xin s book contains  
 essential tools for teachers to help students with learning disabilities or difficulties close the gap in mathematics
