Entrepreneurial Finance Janet Kiholm Smith, Richard L. Smith, Richard T. Bliss, 2011-03-22 Entrepreneurial Finance Strategy Valuation and Deal Structure applies the theory and methods of finance and economics to the rapidly evolving field of entrepreneurial finance This approach reveals how entrepreneurs venture capitalists and outside investors can rely on academic foundations as a framework to guide decision making Unlike other texts this book prepares readers for a wide variety of situations and problems that stakeholders might confront in an entrepreneurial venture Readers will find a unique

and direct focus on value creation as the objective of each strategic and financial choice that an entrepreneur or investor makes. The authors specifically address the influences of risk and uncertainty on new venture success, devoting substantial attention to methods of financial modeling and contract design. Finally, the authors provide a comprehensive survey of approaches to new venture valuation with an emphasis on applications. The book appeals to a wide range of teaching and learning preferences. To help bring the book to life, simulation exercises appear throughout the text. For those who favor the case method, the authors provide a series of interactive cases that correspond with the book chapters as well as suggestions for published cases. Finally, the book is organized to complement the development of a business plan for those who wish to create one as they read along. Entrepreneurial Finance is most effectively used in conjunction with a companion website <http://www.sup.org/entrepreneurialfinance>. On this site, Venture Sim simulation software, spreadsheets, templates, simulation applications, interactive cases, and tutorials are available for download. For those teaching from the book, the authors also provide an invaluable suite of instructor's resources.

Economic and Financial Analysis for Criminal Justice Organizations Daniel Adrian Doss, William H. Sumrall III, David H. McElreath, Don W. Jones, 2013-10-28. From small law offices to federal agencies, all entities within the justice system are governed by complicated economic factors and face daily financial decision making. A complement to Strategic Finance for Criminal Justice Organizations, this volume considers the justice system from a variety of economic and financial perspectives and introduces quantitative methods designed to improve the efficiency and effectiveness of organizations in both the non-profit and for-profit sectors. Using only a minimum of theory, Economic and Financial Analysis for Criminal Justice Organizations demonstrates how to make decisions in the justice system using multiple financial and economic models. Designed for readers with little knowledge of advanced mathematics, quantitative analysis, or spreadsheets, the book presents examples using straightforward step-by-step processes with Excel and Linux Calc spreadsheet software. A variety of different types of decisions are considered, ranging from municipal bond issuance and valuation necessary for public revenues, pension planning, capital investment, determining the best use of monies toward construction projects, and other resource planning, allocation, and forecasting issues. From municipalities and police departments to for-profit prisons and security firms, the quantitative methods presented are designed to improve the efficiency and effectiveness of all organizations in the justice domain.
