

Static Routing Lab

Campus Network Design & Operations Workshop

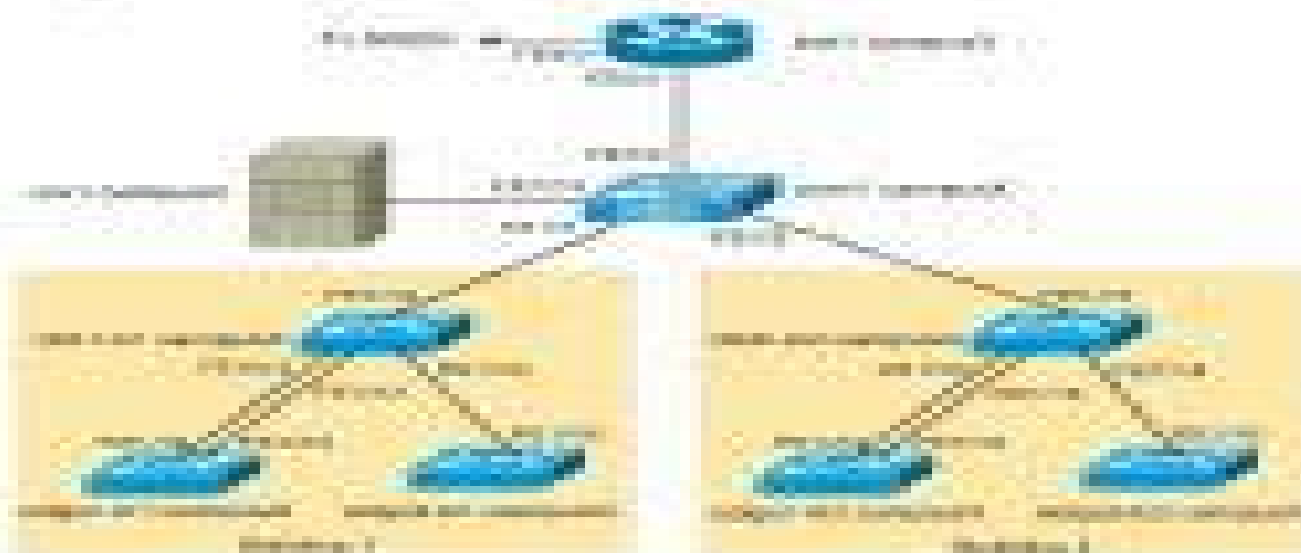

Introduction

The purpose of this lab is to make add Layer 3 functionality to our existing Routed Layer 2 network. The Core Routers have ports 1/1 connected right into the 10.10.10.0/24 routing domain, that difference is that configured now it is broadcast, and now we'll give this campus connectivity to the border router and onwards to the WAN and the Internet.

The class will continue in the 15 groups with each group being assigned some campus to configure, ultimately all will be handed to configuring routing for the border router and onto the WAN. (Note we have some settings available up to now)

Lab Layout

The following diagram shows the layout of the devices and all the links for each campus.
