Interior, Environment, and Related Agencies Appropriations for 2015: Justification of the budget estimates: National Park Service; U.S. Geological Survey United States. Congress. House. Committee on Appropriations. Subcommittee on Interior, Environment, and Related Agencies, 2014 **Interior, Environment, and Related Agencies Appropriations for 2015**

United States. Congress. House. Committee on Appropriations. Subcommittee on Interior, Environment, and Related Agencies, 2014 **Lasers in Oral and Maxillofacial Surgery** Stefan Stübinger, Florian Klämpfl, Michael Schmidt, Hans-Florian Zeilhofer, 2020-03-25 This book provides surgeons with important insights into laser technologies as well as a sound understanding of their current and potential applications within oral and maxillofacial surgery and related disciplines The opening chapters focus on the relevant physical background the technology of the typically used lasers laser tissue interactions and the treatment systems Detailed information is then provided on the various established applications of laser treatments including in relation to skin and mucosa and the dental hard tissues and bone Special applications are also described for example with respect to periodontal surgery peri implantitis therapy photodynamic treatment holography and additive manufacturing The book closes by examining technologies that will soon be available for application in hospitals topics which are currently the subject of research and laser safety Beyond surgeons the book will be of value for engineers and scientists working in the field of medical engineering using lasers *Glocal Religions* Victor Roudometof, 2018-11-07

This book is a printed edition of the Special Issue *Glocal Religions* that was published in *Religions* **The Handbook of Microbial Metabolism of Amino Acids** J P F D'Mello, 2017-04-10 This book collates and reviews recent advances in the microbial metabolism of amino acids emphasizing diversity in terms of the range of organisms under investigation and their natural ecology and the unique features of amino acid metabolism in bacteria yeasts fungi protozoa and nematodes As well as studying the individual amino acids including arginine sulfur amino acids branched chain amino acids and aromatic amino acids a number of themes are explored throughout the work As the volume of research into the metabolism of amino acids grows this comprehensive study of the subject is a vital tool for researchers in the fields of biological medical and veterinary sciences including microbiology biochemistry genetics and pathology This book is also essential for corporate organizations with active research and development programmes such as those in the pharmaceutical industry **Amino Acid Fermentation** Atsushi Yokota, Masato Ikeda, 2017-05-11 This book presents the latest findings on amino acid fermentation and reviews the 50 year history of their development The book is divided into four parts the first of which presents a review of amino acid fermentation past and present The second part highlights selected examples of amino acid fermentation in more detail while the third focuses on recent advanced technologies The last part introduces readers to several topics for future research directions in amino acid production systems A new field amino acid fermentation was created by the progress of academic research and industrial development In 1908 the Japanese researcher Kikunae Ikeda discovered glutamate as an

Umami substance Then a new seasoning MSG monosodium glutamate was commercialized Although glutamate was extracted from the hydro lysate of wheat or soybean in the early days a new production method was subsequently invented fermentation in which glutamate is produced from sugars such as glucose by a certain bacterium called *Corynebacterium*

The topic of this volume is particularly connected in a significant way with biochemical biotechnological and microbial fields Both professionals in industry and an academic audience will understand the importance of this volume *Kucers' The Use of Antibiotics* M. Lindsay Grayson, Sara Cosgrove, Suzanne Crowe, William Hope, James McCarthy, John Mills, Johan W. Mouton, David Paterson, 2017-10-02 *Kucers The Use of Antibiotics* is the definitive internationally authored reference providing everything that the infectious diseases specialist and prescriber needs to know about antimicrobials in this vast and rapidly developing field The much expanded Seventh Edition comprises 4800 pages in 3 volumes in order to cover all new and existing therapies and emerging drugs not yet fully licensed Concentrating on the treatment of infectious diseases the content is divided into four sections antibiotics anti fungal drugs anti parasitic drugs and anti viral drugs and is highly structured for ease of reference Each chapter is organized in a consistent format covering susceptibility formulations and dosing adult and pediatric pharmacokinetics and pharmacodynamics toxicity and drug distribution with detailed discussion regarding clinical uses a feature unique to this title Compiled by an expanded team of internationally renowned and respected editors with expert contributors representing Europe Africa Asia Australia South America the US and Canada the Seventh Edition adopts a truly global approach It remains invaluable for anyone using antimicrobial agents in their clinical practice and provides in a systematic and concise manner all the information required when prescribing an antimicrobial to treat infection *Single-Cell Omics* Debmalya Barh, Vasco Ariston De Car Azevedo, 2019-07-30 *Single cell Omics Volume 2 Advances in Applications* provides the latest single cell omics applications in the field of biomedicine The advent of omics technologies have enabled us to identify the differences between cell types and subpopulations at the level of the genome proteome transcriptome epigenome and in several other fields of omics The book is divided into two sections the first is dedicated to biomedical applications such as cell diagnostics non invasive prenatal testing NIPT circulating tumor cells breast cancer gliomas nervous systems and autoimmune disorders and more The second focuses on cell omics in plants discussing micro algal and single cell omics and more This book is a valuable source for bioinformaticians molecular diagnostic researchers clinicians and several members of biomedical field interested in understanding more about single cell omics and its potential for research and diagnosis Covers the diverse single cell omics applications in the biomedical field Summarizes the latest progress in single cell omics and discusses potential future developments for research and diagnosis Written by experts across the world it brings different points of view and study cases to fully give a comprehensive overview of the topic *Pathway Design for Industrial Fermentation* Walter Koch, 2024-01-16 *Pathway Design for Industrial Fermentation* Explore the industrial fermentation processes of chemical intermediates In *Pathway Design for Industrial*

Fermentation distinguished researcher Dr Walter Koch delivers an expert overview on industrial fermentation production technology as compared with natural extraction organic chemistry and biocatalysis The book offers key insights for professionals designing and monitoring fermentation processes The author explores the applications alternative production biochemical pathways metabolic engineering strategy and downstream processing of various products including C1 to C6 products with a focus on low value products with market prices below 4 per kilogram Products will include methane ethane acetate lactic acid alanine and others With specific commentary and insightful perspectives on the cost drivers and technological aspects critical to commercially successful applications the book also includes Thorough introductions to methane ethanol acetate lactic acid alanine and 3 Hydroxypropionic acid Comprehensive explorations of 1 3 Propanediol butanol isobutanol and isobutene Practical discussions of 1 4 butanediol succinic acid itaconic acid and glutamic acid Fulsome treatments of isoprene pentamethylenediamine lysine citric acid and adipic acid Perfect for process engineers biotechnologists and chemical engineers Pathway Design for Industrial Fermentation will also benefit biochemists and professionals working in the chemical and food industries

Gender Linda L. Lindsey, 2020-12-17 A landmark publication in the social sciences Linda Lindsey s *Gender* is the most comprehensive textbook to explore gender sociologically as a critical and fundamental dimension of a person s identity interactions development and role and status in society Ranging in scope from the everyday lived experiences of individuals to the complex patterns and structures of gender that are produced by institutions in our global society the book reveals how understandings of gender vary across time and place and shift along the intersecting lines of race ethnicity culture sexuality class and religion Arriving at a time of enormous social change the new seventh edition extends its rigorous theoretical approach to reflect on recent events and issues with insights that challenge conventional thought about the gender binary and the stereotypes that result Recent and emerging topics that are investigated include the MeToo and LGBTQ rights movements political misogyny in the Trump era norms of masculinity marriage and family formation resurgent feminist activism and praxis the gendered workplace and profound consequences of neoliberal globalization Enriching its sociological approach with interdisciplinary insight from feminist biological psychological historical and anthropological perspectives the new edition of *Gender* provides a balanced and broad approach with readable dynamic content that furthers student understanding both of the importance of gender and how it shapes individual trajectories and social processes in the U S and across the globe

Engineering of Microorganisms for the Production of Chemicals and Biofuels from Renewable Resources Guillermo Gosset, 2017-01-26 This book reviews state of the art regarding strategies for generating and improving microbial strains designed for utilizing renewable raw materials It discusses methods for genetically engineering of thermophilic bacteria *Saccharomyces cerevisiae* *Escherichia coli* and *Zymomonas mobilis* as well as approaches for obtaining useful products from these renewable raw materials based on biotechnological processes using microbes to chemically transform them However the efficient transformation of

lignocellulosic biomass or glycerol to useful products represents a major challenge Biomass has to be treated physically and chemically to release a mixture of sugars that potentially can be employed by the microbial production strains These hydrolytic treatments result in diverse toxic compounds being generated and released that negatively impact strain performance Furthermore most of the commonly used industrial microbes do not have the natural capacity to efficiently utilize and transform the generated sugar mixtures or glycerol The microbial species reviewed in this book possess particular advantages as production strains and are currently employed for the synthesis of numerous biofuels and chemicals The book reviews the general and strain specific genetic engineering strategies for the improvement of sugar mixtures and glycerol catabolism The issue of lignocellulosic hydrolysate toxicity is addressed in several chapters where genetic engineering and adaptive laboratory evolution strategies are reviewed and discussed The objective of this book is to provide the current knowledge regarding strategies for the generation and improvement of microbial strains designed for the transformation of renewable raw materials into useful products This book aims to become a reference for researchers and students working in this field

Chemical Biology of Natural Products David J. Newman, Gordon M. Cragg, Paul Grothaus, 2017-09-22
Chemical Biology of Natural Products This unique long awaited volume is designed to address contemporary aspects of natural product chemistry and its influence on biological systems not solely on human interactions The subjects covered include discovery isolation and characterization biosynthesis biosynthetic engineering pharmaceutical and other applications of these compounds Each chapter begins with a brief and simple introduction to the subject matter and then proceeds to guide the reader towards the more contemporary cutting edge research in the field with the contributing authors presenting current examples from their own work in order to exemplify key themes Topics covered in the text include genome mining heterologous expression natural product synthesis biosynthesis glycosylation chemical ecology and therapeutic applications of natural products both current and potential

Augmented Reality and Virtual Reality M. Claudia tom Dieck, Timothy H. Jung, Sandra M. C. Loureiro, 2021-05-04 This book features the latest research in the area of immersive technologies presented at the 6th International Augmented Reality and Virtual Reality Conference held in online in 2020 Bridging the gap between academia and industry it presents the state of the art in augmented reality AR and virtual reality VR technologies and their applications in various industries such as marketing education health care tourism events fashion entertainment retail and the gaming industry The book is a collection of research papers by prominent AR and VR scholars from around the globe Covering the most significant topics in the field of augmented and virtual reality and providing the latest findings it is of interest to academics and practitioners alike

The Monetization of Technical Data Daniel Trauth, Thomas Bergs, Wolfgang Prinz, 2023-01-01 The monetization of data is a very young topic for which there are only very few case studies There is a lack of strategy or concept that shows decision makers the way into the monetization of data especially those who have discovered or are threatened by the digital transformation or Industry 4.0 Because machine data is usually

unstructured and not usable without domain knowledge metadata the monetization of machine data has an as yet unquantifiable potential In order to make this potential tangible this work describes not only contributions from science but also practical examples from industry Based on different examples from various industries the reader can already become part of a future data economy today Values and benefits are described in detail The translation was done with the help of artificial intelligence A subsequent human revision was done primarily in terms of content

Things and Thingness in European Literature and Visual Art, 700-1600 Jutta Eming, Kathryn Starkey, 2021-12-06 The eleven chapters in this international volume draw on a variety of theoretical and methodological approaches to focus our attention on medieval and early modern things ca 700 1600 The range of things includes actual objects the Altenburg Crucifixion a copy of Hieronymus Brunschwig's *Liber de arte distillandi a pilgrim's letter* imagined objects a prayed cloak for the Virgin Mary and narrative objects in texts the Alliterative *Morte Arthure* the *Ordene de Chevalerie* Hartmann von Aue's *Erec* Heinrich of Neustadt's *Apollonius of Tyre* Lu's *de Cam'es* *Os Lusadas* and the *vita* of Saint Guthlac Each in its own way the papers consider how things do what they do in texts and art often foregrounding the intersection between the material and the immaterial by exploring such questions as how things act how they express power and how texts and images represent them Medieval and early modern things are repeatedly shown to be more than symbolic or passive they are agentive and determinative in both their intra and extradiegetic worlds The things that are addressed in this volume are varied and are embedded or entangled in different contexts and societies and yet they share a concerted engagement in human life
