

Sample Argumentative Essay Skills vs. Knowledge in Education

Education systems all over the world are based on the idea that students get and remember information from teachers and books. These systems test this knowledge with standardized tests which compare students to each-other. They only test the kind of information which is possible to measure in tests. The goal is gaining information, not developing skills by which to use and make information. Unlike the old style of education where people remembered things in order to pass tests and get higher scores than other students, the modern world calls for a new kind of education in which the focus is deep understanding, creativity, and information management skills.

Most education systems in the world are designed to make students remember things. One reason is that schools feel the need to compare students. They do this by giving tests. They want to be able to give grades and decide which students are smart and which are not. They function as a sorting mechanism for society. From the earliest grades, students are put on tracks that will decide their futures. Another reason schools like to make students remember things is that by doing so they will be able to test their knowledge and determine if they remember or not. They believe that if students remember things it is the same as understanding those things. Schools also like to impart knowledge because in this way, although students can have different individual skills, they can all have the same knowledge.

Einstein said "Imagination is more important than knowledge. Knowledge is limited. Imagination encircles the world" (Needle, 2007). All the knowledge in the world is useless unless you are able to use information in creative ways. Knowledge is what other people have

Sample Essay High School:

Essay Writing Made Easy Stephen McLaren, 2004-10 High Literacy in Secondary English Language Arts Marc Nachowitz, Kristen C. Wilcox, 2018-11-07 This volume culls scholarship on both what high literacy is and how it is developed. It embraces the call put forth by Langer and Applebee 2016 that high literacy must continue to be our aim and to see more research analyzing and identifying how teachers might promote literacy practices that promote deep thinking around important content. The editors offer a conceptual framework for high literacy that explicates how each component i.e. reading, writing, dialogic engagement and epistemic cognition in literary reasoning relates to the others and from what scholarly literature these concepts have been derived. Individual chapter authors provide in depth examinations of the existing research base on particular related topics focusing on the two important cross cutting aims of the volume: 1. explicating the roles reading, writing, dialogic engagement and epistemic cognition hold in high literacy development and 2. providing examples of practices recommended to develop high literacy.
