Transparency

- ❖ To receive the best possible care that the hospital can deliver, using the most current knowledge and resources.
- ❖ To have my care provided in the safest manner possible to reduce the likelihood of errors or harm.
- ❖ To have the opportunity to review my medical records with my healthcare providers, should I so choose.

Collaboration & Communication

- ❖ To receive complete and current information on my condition and treatment plan, so that I and my family can understand, question and be active participants with my healthcare team, with the ability to participate in clinical decisions.
- ❖ To have a discharge plan in order to understand next steps in my care that maximizes my independence when I leave the hospital.

- ❖ To effective communication and the opportunity to ask my healthcare provider questions about my care.
- ❖ To know that my personal information and privacy is respected and protected.
- ❖ To receive this current information in a manner and format that I understand and in the language of my choosing.

Excellence & Confidentiality

Respect & Dignity

- ❖ To be treated with courtesy and respect that fully recognizes my dignity, privacy, diversity and human rights.
- ❖ To have my healthcare providers introduce themselves and call me by my name.
- ❖ To receive competent and timely care, every encounter.

I have the right ...

- ❖ To be treated with empathy, patience, kindness and dignity with a focus on my body, mind and spiritual needs.
- ❖ To have healthcare providers that understand the patient story.
- ❖ To designate a person to represent or support me in decisions about my treatment or care.

Scenarios Reflecting Patients Rights:

The Status of the Family in Law and Bioethics Roy Gilbar, 2017-11-28 Where do a doctor's responsibilities lie in communicating diagnostic and predictive genetic information to a patient's family members? On the one hand, a patient may wish to retain confidentiality while the relatives seek information; on the other, a patient may wish to share the information while the relatives would rather not know. This volume investigates the doctor's professional, legal, and ethical obligations in the context of these two familial tensions. The examination is conducted within the liberal communitarian debate whereby the two philosophies hold different perceptions of the individual and the relationship he or she has with others. Within this theoretical framework, the book examines the approach taken by English medical law and ethics to the communication of genetic information to family members. Legally, the focus is on tort law and the law of confidentiality. Ethically, it concentrates on the approach taken by the bioethical literature and more specifically by codes of ethics and professional guidelines.

The New Accountability

Michael Mason, 2012-05-23 The growth of pollution that crosses national borders represents a significant threat to human health and ecological sustainability Various international agreements exist between countries to reduce risks to their populations however there is often a mismatch between national territories of state responsibility and transboundary hazards All too often state priorities do not correspond to the priorities of the people affected by pollution who often have little recourse against major polluters particularly transnational corporations operating across national boundaries Drawing on case studies The New Accountability provides a fresh understanding of democratic accountability for transboundary and global harm and argues that environmental responsibility

should be established in open public discussions about harm and risk Most critically it makes the case that regardless of nationality affected parties should be able to demand that polluters and harm producers be held accountable for their actions and if necessary provide reparations
