The Evolution of Human Wisdom Celia Deane-Drummond, Agustín Fuentes, 2017-10-18 This volume addresses key questions about the puzzle of human origins by focusing on a topic that is largely unexplored thus far namely the evolution of human wisdom How can we best understand the human capacity for wisdom where did it come from and how did it emerge It explores lines of convergence and divergence between Christian theology and evolutionary anthropology in its search to identify different aspects of wisdom Critical to this discussion are the philosophical difficulties that arise when two very different methodological approaches to the manner of humans becoming wise are brought together The relative importance

and significance of human language is another area of intense debate in defining the meaning of wisdom and its expression How far and to what extent does a theologically informed wisdom discourse push evolutionary anthropology to formulate new questions and vice versa This volume shows that there is no simple consonance between evolutionary anthropology and theology Yet each discipline has much to learn from the other the authors are in agreement that even in the midst of an awareness of dissonance and some tension there can still be mutual respect The goal of this book is to begin to develop a trans disciplinary approach to the evolution of human wisdom where each discipline is challenged to ask questions in a new way This volume tackles the relationship between theology and science in a fresh way by focusing on a specific theme wisdom that is equally generative for both theology and evolutionary anthropology **The Outlaw Ocean** Ian

Urbina,2019-08-20 NATIONAL BESTSELLER A riveting adrenaline fueled tour of a vast lawless and rampantly criminal world that few have ever seen the high seas There are few remaining frontiers on our planet But perhaps the wildest and least understood are the world s oceans too big to police and under no clear international authority these immense regions of treacherous water play host to rampant criminality and exploitation Traffickers and smugglers pirates and mercenaries wreck thieves and repo men vigilante conservationists and elusive poachers seabound abortion providers clandestine oil dumpers shackled slaves and cast adrift stowaways drawing on five years of perilous and intrepid reporting often hundreds of miles from shore Ian Urbina introduces us to the inhabitants of this hidden world Through their stories of astonishing courage and brutality survival and tragedy he uncovers a globe spanning network of crime and exploitation that emanates from the fishing oil and shipping industries and on which the world s economies rely Both a gripping adventure story and a stunning expos this unique work of reportage brings fully into view for the first time the disturbing reality of a floating world that connects us all a place where anyone can do anything because no one is watching **Deconstructing Digital**

Capitalism and the Smart Society Mel van Elteren,2025-01-01 Today s critics of big online platforms tend to consider privacy breaches monopolistic practices and the deployment of surveillance technologies as the main problems Internet reformers suggest the answers to these issues reside in more and better regulations While the questions of privacy data and size are indeed important they are secondary however to a deeper set of concerns about platform ownership and control and who benefits from the current status quo This book examines these issues and offers an historical overview and in depth analysis of digital capitalism and its prevailing practices as it has become increasingly intertwined with various forms of online surveillance behavior modification and the delegation of managerial functions to algorithmic and automated systems in platform economies The approach taken extends to the wider array of data driven internet connected and automated systems that involve digital devices and technologies centered on three smart spaces the smart self the smart home and the smart city Antitrust and other regulatory measures by the European Union and the United States that are aimed at restraining platform capitalism are also discussed The focus in particular is on recent developments regarding artificial

intelligence and their potentially harmful implications This is followed by a critical look at proposals for more far reaching institutional reforms revolving around the creation of forms of platform socialism that build partly on existing practices of platform cooperativism The book concludes with a diagnosis of the global situation among the competing digital empires the United States the European Union and China and considers whether or not under the present conditions any form of democratic platform socialism could materialize on a wider scale in the near future

Exhibiting the Archive Peter Lester, 2022-06-24 Exhibiting the Archive examines the role that exhibition plays in archives and analyses the impact they are understood to have on how users and visitors experience the archive Drawing on research conducted in Europe North America and Australia the book analyses the key theoretical and social influences on exhibition making in archives today and discusses the role of exhibitions in the archives of tomorrow This is the first in depth study to consider exhibition as more than outreach or advocacy it frames exhibition as an encounter with archives and with people and interprets it as a mechanism for change within the archive Against a backdrop of increasing digital activity Lester asks what experience within the physical space of the archive could be Drawing on ideas of spatiality and embodiment as well as social justice and activism Lester considers the role of exhibitions within the physical archive and the part they can play in reshaping how experience is understood to happen within it Exhibiting the Archive offers a new perspective on the archive that will be of interest to academics and students engaged in the study of archives and records The discussions of cutting edge practice offer new insights into how exhibitions are conceived and made and will therefore be of interest to practitioners around the world

Phenomenology and Intercultural Understanding Kwok-Ying Lau, 2016-09-29 This book approaches the topic of intercultural understanding in philosophy from a phenomenological perspective It provides a bridge between Western and Eastern philosophy through in depth discussion of concepts and doctrines of phenomenology and ancient and contemporary Chinese philosophy Phenomenological readings of Daoist and Buddhist philosophies are provided the reader will find a study of theoretical and methodological issues and innovative readings of traditional Chinese and Indian philosophies from the phenomenological perspective The author uses a descriptive rigor to avoid cultural prejudices and provides a non Eurocentric conception and practice of philosophy Through this East West comparative study a compelling criticism of a Eurocentric conception of philosophy emerges New concepts and methods in intercultural philosophy are proposed through these chapters Researchers teachers post graduates and students of philosophy will all find this work intriguing and those with an interest in non Western philosophy or phenomenology will find it particularly engaging

Realities in Pedagogical and

Phenomenological Contexts Malte Brinkmann, Johannes Türistig, Martin Weber-Spanknebel, 2025-05-28 What is real What is evident What is true These questions of the constitution of reality in our experiences are among the key questions of phenomenology since its beginning Lately they become especially relevant under conditions of digitalisation acceleration optimisation crises and pandemics In this volume these questions are taken up in different interdisciplinary and intercultural phenomenological perspectives from a pedagogical point of view Starting from a critique of instrumental scientism and optimisation the contributions in this book ask about the theoretical empirical methodological and practical constitution of reality within experiences of learning Bildung and education as well as the subjects materialities and mediality of such experiences in different pedagogical fields and institutions The contributions show how Phenomenological Pedagogy is fruitful to explore the realities of pedagogical practices by grasping lifeworldly lived bodily and social experiences in a qualitatively meaningful empirical and experience oriented way It can thus serve as an alternative to positivistic scientific idealistic or psychologistic approaches Dramaturgy to Make Visible Peter Eckersall, 2024-06-14 This book argues that dramaturgy makes things visible and does so in two distinct and interrelating ways creative processes and formal elements of performance are rendered visible and readable and performance dramaturgy becomes an expanded practice in which performance is a locus for creating wide ranging events and activities This exploration defines dramaturgy as a perceptibly transforming agency in the construction presentation and reception of contemporary performance and it shows how contemporary performance has an intrinsic dramaturgical aspect whose proliferation of dramaturgical practices has led to a far reaching reinvention of what contemporary theatre is In doing so this book deals with a careful selection of performance practices including theatrical adaptations new media dramaturgy contemporary dance installation performance postdramatic theatre visionary works by auteurs and revivals of well known stage shows This study will be of great interest to students and scholars in theater studies performance studies cultural studies curating and dance scholarship
