commercialization prospects as well as recent research programs and organizations      *The Caliphate at War* Ahmed Hashim, 2018-02-01 ISIS's astonishing and unexpected military victories in 2014 and 2015 redrew the geopolitical map of the Middle East. Media attention focused on the organisation's savage treatment of its enemies and its ability to attract foreign fighters but as this dispassionate book demonstrates it also made important innovations in strategy, ideology and governance. Ahmed S Hashim argues that by focusing their ideology first and foremost on extreme anti-Shia sectarianism rather than on Western infidels, ISIS founders were able to present themselves as the saviours of what they saw as the embattled Sunni nation in Iraq. This enabled them to win the support of Sunni communities. Moreover, ISIS's stunning ability to take major cities was a result of its innovative tactics. It sowed terror in advance of its attacks by using targeted assassinations to kill key city leaders and its decentralised regional command structure facilitated an unusual degree of coordination between small assault units. At the same time, the organisation made a serious effort to engage in state building and population control. By going beyond the often starkly unpleasant current affairs of the Islamic State, *The Caliphate at War* undertakes an essential investigation into the successes of the group to better understand how the movement has survived, thrived and reshaped the Middle East.      **The SAGE Handbook of Research in International Education** Mary Hayden, Jack Levy, Jeff

Thompson, 2015-10-13 The landscape of international education has changed significantly in the last ten years and our understanding of concepts such as international, global and multicultural are being re-evaluated. Fully updated and revised and now including new contributions from research in South East Asia, the Middle East, China, Japan, Australasia and North America, the new edition of this handbook analyses the origins, interpretations and contributions of international education and explores key contemporary developments including internationalism in the context of teaching and learning, leadership standards and quality in institutions and systems of education, the promotion of internationalism in national systems. This important collection of research is an essential resource for anyone involved in the practice and academic study of international education including researchers and teachers in universities, governmental and private curriculum development agencies, examination authorities, administrators and teachers in schools.      *Bihar and Mithila* J. Albert

Rorabacher, 2016-09-13 The struggling states of Bihar and Mithila serve as extreme examples of India's problems. Development here has been thwarted by a hereditary landed aristocracy supported by religion, casteism, custom, social stratification, tradition and patterns of behaviour that can be traced back millennia. In turn, all these have been masterfully manipulated by co-opted politicians who have turned politics into a veritable art form. As this volume comprehensively demonstrates, please note: Taylor Francis does not sell or distribute the hardback in India, Pakistan, Afghanistan, Nepal, Bhutan, Bangladesh and Sri Lanka.      **The Entrepreneurial State** Mariana Mazzucato, 2024-02-06 Award-winning economist Mariana Mazzucato's famously incisive international bestseller debunking the pervasive myth of the inept state versus an innovative private sector with a new preface by the author. According to conventional wisdom, innovation is best left to the

bold entrepreneurs of the private sector and government should get out of the way But what if that wasn't the case What if from the inventions of Silicon Valley to medical breakthroughs the public sector has actually been the most courageous and valuable risk taker of all Critically acclaimed and influential thinker and scholar Mariana Mazzucato argues comprehensively against the myth of a lumbering bureaucratic state versus a dynamic innovative private sector with remarkable original and deep research In a series of case studies from nanotechnology to the emerging green tech of today Mazzucato reveals that the opposite is true the private sector only finds the courage to invest after an entrepreneurial state has made the high risk investments The Entrepreneurial State reveals how every technology that makes the iPhone so smart was actually funded by the government from the Internet and GPS technology to touch screen displays and voice activated Siri In the history of modern capitalism the State has not only fixed market failures but has also actively shaped and created markets In doing so it sometimes wins and sometimes fails Yet by not admitting the State's role in active risk taking we've created an innovation system where the public sector socializes risks while privatizing reward as Mazzucato controversially argues This bold and provocative book considers how we adopted this dysfunctional dynamic and then how we can overcome it so that economic growth can be not only smart but inclusive as well
