Perspectives on the Knowledge Problem in New Zealand Education Megan Lourie,Graham McPhail,2021-08-06

This book offers new ideas for thinking about how more equitable outcomes might be achieved in New Zealand so that all students are well equipped to live and work in contemporary society. It addresses a social justice concern about access to the unique affordances of subject knowledge which comprises two forms of knowledge: propositional knowledge that and applied knowledge know how to. The book provides perspectives on curriculum design by grounding arguments in a theory of knowledge. It describes the different knowledge forms of the theory and argues that understanding these differences is significant for curriculum design and enactment. It explains why the current imbalance between knowledge forms is a problem and offers suggestions for change. Understanding about knowledge itself enables more just and equitable outcomes for all students. This book illustrates how different knowledge types and forms can be used together productively to help students develop adaptive expertise for the 21st century making it a valuable contribution to the field of education.

Educational Regimes and Anglo-American Democracy Ronald A. Manzer, 2003-01-01. Manzer's comparative political study of schools in Australia, Canada, New Zealand, the United Kingdom, and the United States focuses on five fundamental problems in the historical development of Anglo American educational regimes: the original creation of systems of elementary education in the nineteenth century as publicly provided and publicly governed; the transformation of secondary schools in the early twentieth century to match the emerging structure of occupational classes in capitalist industrial economies; the planning for secondary schools in the development of the welfare state after the Second World War; the accommodation of social diversity in public schools from the 1960s to the 1990s in response to increasingly strong assertions of ethnicity, language, race, and religion; not only as criteria for equal treatment but also as foundations of communal identity and more.

Useful Assessment and Evaluation in Language Education John McE. Davis, John M. Norris, Margaret E. Malone, Todd H. McKay, Young-A Son, 2018-03-01. The specific and varied ways in which assessment and evaluation can impact learning and teaching have become an important language education research concern, particularly as educators are increasingly called on to implement these processes for improvement, accountability, or curricular development purposes. *Useful Assessment and Evaluation in Language Education* showcases contemporary research that explores innovative uses of assessment and evaluation in a variety of educational contexts. Divided into three parts, this volume first examines theoretical considerations and practical implementations of assessment conducted for the purpose of enhancing and developing language learning. Part 2 addresses novel assessment development and implementation projects such as the formative use of task-based assessments, technology-mediated language performance assessment, validation of educational placement tests for immigrant learners, and the use of assessment to help identify neurolinguistic correlates of proficiency. The final section of the book highlights examples of argument-based approaches to assessment and evaluation, extending this critical framework to quality assurance efforts in new domains. Adding to research on traditional and conventional uses of testing and evaluation in language education, this volume captures innovative trends in assessment and evaluation practice that explicitly
