The Case for Pandora James M. Essig, Steve McCarter, 2017-01-12 This book is about building craft for space travel space travel not in the far distant future but in the immediate future There is no question that we have the technology to build and power a large craft capable of traversing the galaxy and for now this book will focus on achieving the goal of intragalactic travel We will describe various methods of power generation and propulsion delineate the materials and technology for construction discuss the building of the spacecraft from the outside in and show what is required to sustain life on the craft for extended periods of time While we will go into some detail on each of these pointing out advantages and disadvantages to components and methods this is not nor is it intended to be a highly technical book to be used by specialists Rather it is intended to inform the general readership about what is possible and perhaps what is not in building and operating spacecraft for long distance and long duration travel with current and available means

The Indian

Space Programme Gurbir Singh, 2017-10-17 Fifty years in the making India's Space Programme is fulfilling the vision of its founders and delivering services from space that touch the lives of 1.3 billion people every day. In addition to operating a collection of satellites for weather, Earth observation, navigation and communication, today India has a spacecraft orbiting Mars and a space telescope in Earth orbit. This book provides the big picture of India's long association with science, from historical figures like Aryabhata and Bhaskara to Homi Bhabha and Vikram Sarabhai, the key architects of its space program. It covers the scientific contribution of Indian scientists during the European Enlightenment and industrial revolution. It traces the technological development of Tipu Sultan's use of rockets for war in the 1780s, the all-but-forgotten contribution of Stephen H. Smith's use of rockets as a means of transport in 1935 in northern India, and the emergence of Sriharikota, India's spaceport, the heart of India's modern Space Programme. A detailed account of how a fishing village in Kerala was transformed into a space centre and used to launch India's first rocket into space on 21 November 1963. A detailed summary of India's space infrastructure, launch vehicles, deep space network, Telemetry, Tracking and Command, and space assets in orbit. Description of how the ordinary people of India benefit from the services delivered by the space programme. Why India chose to go to the Moon and Mars and how it got there. The prospects for India's ambitions in space for human spaceflight, national security and scientific exploration. An analysis of how India's Space Programme may play out on the global stage. Will it compete or collaborate with China, USA and Russia in space. This detailed work in 645 pages, 29 tables and 9 appendices is richly illustrated with 140 illustrations, some images published for the first time, and supported by over 1,000 references. It is written for the non-specialist, offering a big picture view.

CACGP Symposium on Tropospheric Chemistry with Emphasis on Sulphur and Nitrogen Cycles and the Chemistry of Clouds and Precipitation P. Goldsmith, 2015-08-11 CACGP Symposium on Tropospheric Chemistry contains papers presented at the Symposium on Tropospheric Chemistry with Emphasis on Sulphur and Nitrogen Cycles and the Chemistry of Clouds and Precipitation. Organized into 24 chapters, this book begins with a discussion on the trace gas and aerosol measurements at a remote site in the northeast U.S., satellite measurements of aerosol mass and transport, and measurements of reactive nitrogen compounds in the free troposphere. Subsequent chapters explore kinetic study of reactions of some organic sulfur compounds with OH radicals, analysis of precipitation collected on a sequential basis, and measurements of the chemical composition of stratiform clouds. The book also discusses sulfur isotope ratio studies in a geothermal region, the oxidation of isoprene in the troposphere, a 2-D model of global aerosol transport, and theoretical studies of intermediates in the sulfur oxidation cycle.

Pathways to Reform Alexandra W. Logue, 2017-09-08 A personal account of the implementation of a controversial credit transfer program at the nation's third largest university Change is notoriously difficult in any large organization Institutions of higher education are no exception From 2010 to 2013 Alexandra Logue then chief academic officer of The City University of New York led a controversial reform initiative known as Pathways The program aimed to facilitate the transfer of credits among the university's nineteen constituent colleges in order to improve graduation rates a long recognized problem for public universities such as CUNY Hotly debated Pathways met with vociferous resistance from many faculty members drew the attention of local and national media and resulted in lengthy legal action In Pathways to Reform Logue the figure at the center of the maelstrom blends vivid personal narrative with an objective perspective to tell how this hard fought plan was successfully implemented at the third largest university in the United States Logue vividly illustrates why change does or does not take place in higher education and the professional and personal tolls exacted Looking through the lens of the Pathways program and factoring in key players she analyzes how governance structures and conflicting interests along with other institutional factors impede change which Logue shows is all too rare slow and costly In this environment she argues it is shared governance combined with a strong central decision making authority that best facilitates necessary reform Logue presents a compelling investigation of not only transfer policy but also power dynamics and university leadership Shedding light on the inner workings of one of the most important public institutions in the nation Pathways to Reform provides the first full account of how despite opposition a complex higher education initiative was realized All net royalties received by the author from sales of this book will be donated to The City University of New York to support undergraduate student financial aid

Petroleum and Public Safety James B. McSwain, 2018-07-06 Throughout the twentieth century cities such as Houston Galveston New Orleans and Mobile grappled with the safety hazards created by oil and gas industries as well as the role municipal governments should play in protecting the public from these threats James B McSwain's Petroleum and Public Safety reveals how officials in these cities created standards based on technical scientific and engineering knowledge to devise politically workable ordinances related to the storage and handling of fuel Each of the cities studied in this volume struggled through protracted debates regarding the regulation of crude petroleum and fuel oil sparked by the famous Spindletop strike of 1901 and the regional oil boom in the decades that followed Municipal governments sought to ensure the safety of their citizens while still reaping lucrative economic benefits from local petroleum industry activities Drawing on historical antecedents such as fire protection engineering the cities of the Gulf South came to adopt voluntary consensual fire

codes issued by insurance associations and standards organizations such as the National Board of Fire Underwriters the National Fire Protection Association and the Southern Standard Building Code Conference The culmination of such efforts was the creation of the International Fire Code an overarching fire protection guide that is widely used in the United States Mexico the Caribbean and Central America In devising ordinances Gulf South officials pursued the politics of risk management as they hammered out strategies to eliminate or mitigate the dangers associated with petroleum industries and to reduce the possible consequences of catastrophic oil explosions and fires Using an array of original sources including newspapers municipal records fire insurance documents and risk management literature McSwain demonstrates that Gulf South cities played a vital role in twentieth century modernization The Report: Oman 2019 Oliver Cornock, Following the global oil price drop in 2014 Oman like the other GCC states is pushing ahead with its long term national development plans that seek to diversify the economy Department of Defense Appropriations United States.
