The Chemical News and Journal of Physical Science ,1895 Federal Register ,1983-12-27 **Nuclear Power** National Research Council,Division on Engineering and Physical Sciences,Commission on Engineering and Technical Systems,Energy Engineering Board,Committee on Future Nuclear Power Development,1992-02-01 The construction of nuclear power plants in the United States is stopping as regulators reactor manufacturers and operators sort out a host of technical and institutional problems This volume summarizes the status of nuclear power analyzes the obstacles to resumption of construction of nuclear plants and describes and evaluates the technological alternatives for safer more economical reactors Topics covered include Institutional issues including regulatory practices at the federal and state levels the growing trends toward greater competition in the generation of electricity and nuclear and nonnuclear generation options Critical evaluation of advanced reactors covering attributes such as cost construction time safety development status and fuel cycles Finally three alternative federal research and development programs are presented **How We Teach Science** John L. Rudolph,2019-06-01 A former Wisconsin high school science teacher makes the case that how and why we teach science matters especially now that its legitimacy is under attack Why teach science The answer to that question will determine how it is taught Yet despite the enduring belief in this country that science should be taught there has been no enduring consensus about how or why This is especially true when it comes to teaching scientific process Nearly all of the basic knowledge we have about the world is rock solid The science we teach in high schools in particular laws of motion the structure of the atom cell division DNA replication the universal speed limit of light is accepted as the way nature works Everyone also agrees that students and the public more generally should understand the methods used to gain this knowledge But what exactly is the scientific method Ever since the late 1800s scientists and science educators have grappled with that question Through the years they've advanced an assortment of strategies ranging from the laboratory method to the five step method to science as inquiry to no method at all How We Teach Science reveals that each strategy was influenced by the intellectual cultural and political circumstances of the time In some eras learning about experimentation and scientific inquiry was seen to contribute to an individual's intellectual and moral improvement while in others it was viewed as a way to minimize public interference in institutional science John Rudolph shows that how we think about and teach science will either sustain or thwart future innovation and ultimately determine how science is perceived and received by the public **Science, Cold War and the American State** Allan A. Needell,2013-02-01 This book illuminates how Berkner became a model that produced the scientist advisor policymaker that helped build post war America It does so by providing a detailed account of the personal and professional beliefs of one of the most influential figures in the American scientific community a figure that helped define the political and social climates that existed in the United States during the Cold War *Leisure and Pleasure* Caroline Daley,2013-10-01 This exploration of an unexpected aspect of New Zealand

social history examines the human body at leisure in the years 1900 growing ideas about fitness health and exercise the rise of beauty contests the culture of the beach and the pool nudism and children s play and the appearance of playgrounds The central aim is to explore how bodies men s women s and children s were shaped and displayed through various leisure pursuits in 20th century New Zealand

Additions to the 3d ed William Whewell,1858 The Age of Hiroshima Michael D. Gordin,G. John Ikenberry,2020-01-14 A multifaceted portrait of the Hiroshima bombing and its many legacies On August 6 1945 in the waning days of World War II the United States dropped an atomic bomb on the Japanese city of Hiroshima The city s destruction stands as a powerful symbol of nuclear annihilation but it has also shaped how we think about war and peace the past and the present and science and ethics The Age of Hiroshima traces these complex legacies exploring how the meanings of Hiroshima have reverberated across the decades and around the world Michael D Gordin and G John Ikenberry bring together leading scholars from disciplines ranging from international relations and political theory to cultural history and science and technology studies who together provide new perspectives on Hiroshima as both a historical event and a cultural phenomenon As an event Hiroshima emerges in the flow of decisions and hard choices surrounding the bombing and its aftermath As a phenomenon it marked a revolution in science politics and the human imagination the end of one age and the dawn of another The Age of Hiroshima reveals how the bombing of Hiroshima gave rise to new conceptions of our world and its precarious interconnectedness and how we continue to live in its dangerous shadow today Re-entry and Planetary Entry Physics and Technology W.H.T. Parliament. House of Commons,1918 *The Athenæum* James Silk Buckingham,John Sterling,Frederick Denison Maurice,Henry Stebbing,Charles Wentworth Dilke,Thomas Kibble Hervey,William Hepworth Dixon,Norman Maccoll,Vernon Horace Rendall,John Middleton Murry,1908 **To See the Unseen** Andrew J. Butrica,1996 A comprehensive illuminating history of this little understood but surprisingly significant scientific activity Quite rigorous systematic in its methodology the book explores the development of the radar astronomy specialty in the larger community of scientists More than just discussing the development of this field however the author uses planetary radar astronomy as a vehicle for understanding larger issues relative to the planning execution of big science by the Fed government Sources interviews technical essay abbreviations index **Athenaeum and Literary Chronicle** James Silk Buckingham,John Sterling,Frederick Denison Maurice,Henry Stebbing,Charles Wentworth Dilke,Thomas Kibble Hervey,William Hepworth Dixon,Norman Maccoll,Vernon Horace Rendall,John Middleton Murry,1886 *Aeronautical Engineering Review* ,1957 *The Athenaeum* ,1907 **One Nation Under Gold** James Ledbetter,2017-06-13 One Nation Under Gold examines the countervailing forces that have long since divided America whether gold should be a repository of hope or a damaging delusion that has long since derailed the rational investor Worshipped by Tea Party politicians but loathed by sane economists gold has historically influenced American monetary policy and has exerted an often outsized influence on the national psyche for centuries Now acclaimed business writer James Ledbetter explores the tumultuous history and larger than life personalities from George Washington to Richard Nixon behind America s volatile relationship to this hallowed metal and investigates what this enduring obsession reveals about the American identity Exhaustively researched and expertly woven One Nation Under Gold begins with the nation s founding in the 1770s when the new republic erupted with bitter debates over the implementation of paper currency in lieu of metal coins Concerned that the colonies thirteen separate currencies would only lead to confusion and chaos some Founding Fathers believed that a national currency would not only unify the fledgling nation but provide a perfect solution for a country that was believed to be lacking in natural silver and gold resources Animating the Wild West economy of the nineteenth century with searing insights Ledbetter brings to vivid life the actions of Whig president Andrew Jackson one of gold s most passionate advocates whose vehement protest against a standardized national currency would precipitate the nation s first feverish gold rush Even after the establishment of a national paper currency the virulent political divisions continued reaching unprecedented heights at the Democratic National Convention in 1896 when presidential aspirant William Jennings Bryan delivered the legendary Cross of Gold speech that electrified an entire convention floor stoking the

fears of his agrarian supporters While Bryan never amassed a wide enough constituency to propel his cause into the White House America's stubborn attachment to gold persisted wreaking so much havoc that FDR in order to help rescue the moribund Depression economy ordered a ban on private ownership of gold in 1933 In fact so entrenched was the belief that gold should uphold the almighty dollar it was not until 1973 that Richard Nixon ordered that the dollar be delinked from any relation to gold completely overhauling international economic policy and cementing the dollar's global significance More intriguing is the fact that America's exuberant fascination with gold has continued long after Nixon's historic decree as in the profusion of late night television ads that appeal to goldbug speculators that proliferate even into the present One Nation Under Gold reveals as much about American economic history as it does about the sectional divisions that continue to cleave our nation ultimately becoming a unique history about economic irrationality and its influence on the American psyche
