Science Katherine Brading,2019-01-15 The centerpiece of milie Du Ch telet s philosophy of science is her Foundations of Physics first published in 1740 The Foundations contains epistemology metaphysics methodology mechanics and physics including such pressing issues of the time as whether there are atoms the appropriate roles of God and of hypotheses in scientific theorizing how if at all bodies are capable of acting on one another and whether gravity is an action at a distance force Du Ch telet sought to resolve these issues within a single philosophical framework that builds on her critique and appraisal of all the leading alternatives Cartesian Newtonian Leibnizian and so forth of the period The text is remarkable for being the first to attempt such a synthetic project and even more so for the accessibility and clarity of the writing This book argues that Du Ch telet put her finger on the central problems that lay at the intersection of physics and metaphysics at the time and tackled them drawing on the most up to date resources available It will be a useful source for students and scholars interested in the history and philosophy of science and in the impact of women philosophers in the early modern period

Reality and Humean Supervenience Gerhard Preyer,Frank Siebelt,2002-07-15 If asked what Humeanism could mean today there is no other philosopher to turn to whose work covers such a wide range of topics from a unified Humean perspective as that of David Lewis The core of Lewis s many contributions to philosophy including his work in philosophical ontology intensional logic and semantics probability and decision theory topics within philosophy of science as well as a distinguished philosophy of mind can be understood as the development of philosophical position that is centered around his conception of Humean supervenience If we accept the thesis that it is physical science and not philosophical reasoning that will eventually arrive at the basic constituents of all matter pertaining to our world then Humean supervenience is the assumption that all truths about our world will supervene on the class of physical truths in the following sense There are no truths in any compartment of our world that cannot be accounted for in terms of differences and similarities among those properties and external space time relations that are fundamental to our world according to physical science
