Athalye Sapre Pitre College Devrukh has always been on the forefront in organizing different academic co curricular and administrative activities to nurture the student s minds and equip them with skills to face the challenges of the real world situations with academic excellence UGC sponsored Three Day National Conference on Renewable Energy and Environment was jointly organized by the Department of Chemistry and Physics during 25th to 27th September 2014 The main objective of this conference was to provide platform to researches in the field of Physics Chemistry Technology Economics Commerce Geography and Environmental sciences to share problems and prospects in the field of energy and environment and to compile intellectual inputs for the sustainable development of our country Protection of the Environment and Climate and their preservation is a demanding social scientific and economical task Utilization of renewable energy efficient conversions of fossil fuel are not only environmentally and climatically beneficial they also preserve the finite energy sources Awareness of this global issue at the grass root level is the need of the hour Renewable energy and environment is the subject of global attention The present scenario between energy generation consumption and depletion of sources of conventional energy has various impacts on Environment Conservation of renewable energy sources and protection of environment are the burning issues at the global level Unless a long term planning is done to handle these issues and make them commercially viable and environment friendly alternative technologies are developed The potential of renewable energy sources is enormous as they can in principle meet many times the world s energy demand Renewable energy sources such as small hydropower wind solar biomass and geothermal can provide sustainable energy services based on the use of routinely available indigenous resources I am sure such platforms through national conference will definitely help to promote various academicians scientist and research students to share and absorb various new ideas which will help our country to overcome fuel crisis and environmental problems *Small reservoirs in Africa: a review and synthesis to strengthen future investment* Saruchera, D., Lautze, Jonathan, 2019-11-04 **Coal and Coalbed Gas** Romeo M. Flores, Tim A. Moore, 2024-01-24 Coal and Coalbed Gas Future Directions and Opportunities Second Edition introduces the latest in coal geology research and the engineering of gas extraction Importantly the second edition examines how over the last 10 years research has both changed focus and where it is conducted This shift essentially depicts a tale of two worlds one half Western Europe North America moving away from coal and coalbed gas research and production towards cleaner energy resources and the other half Asia Pacific region Eastern Europe South America increasing both research and usage of coal These changes are marked by a precipitous fall in coalbed gas production in North America however at the same time there has been a significant rise in coal and coalbed gas production in Australia China and India The driver for higher production and its associated research is a quest for affordable energy and economic security that a large resource base brings to any country like Australia s first large scale coalbed gas to liquid natural gas projects supplying the demand for cleaner burning LNG to the Asian Pacific region Since the last edition of

this book global climate change policies have more forcibly emphasized the impact of methane from coal mines and placed these emissions equal to or even more harmful than CO₂ emissions from fossil fuels in general Governmental policies have prioritized capture use and storage of CO₂ burning coal in new highly efficient low emission power plants and gas pre drainage of coal mines The Organization for Economic Cooperation and Development OECD countries and China are also introducing new research into alternative non fuel uses for coal such as carbon fibers nanocarbons graphene soil amendments and as an unconventional ore for critical elements New to this edition Each chapter is substantially changed from the 1st edition including expanded and new literature citations and reviews important new data and information new features and materials as well as re organized and re designed themes Importantly three new chapters cover global coal endowment and gas potential groundwater systems related to coalbed gas production and biogenic gas generation as well as the changing landscape of coal and coalbed gas influenced by global climate change and net zero carbon greenhouse gas emissions

FOREWORD When I reviewed the first edition of this book my initial thought was Do we need another book on coal geology and then I read it and realised Yes we need this book and my students downloaded copies as soon as it was available So now we come to 2023 and a lot has happened in the past decade For a different reason we might ask if we still need this book or even coal geoscientists and engineers as the world aims for rapid decarbonisation of the energy sector and a reduction of coal as a feedstock for industrial resources like steel manufacture
