Trundle, 2019-02-14 This book is of vital interest to anyone who

yearns to know how science theology ethics art and politics do really afford objective truths Not only that but how these truths in seemingly clashing areas are interrelated by common sense and rooted in our incontrovertible consciousness of Being itself Being itself as the basis for truth is defended against truth denying modern philosophers who having headed in the wrong direction with tragic costs of murderous ideologies have completely misunderstood the simple origin of truth in the realist tradition of Aristotle Aquinas Etienne Gilson and others Their profoundness is not bamboozled by the covert and corrupting sophism of today's teachings Anyone interested in surmounting these teachings that include political correctness and a false divide of fact from value which paralyze the very modern ethics that helped to create them should read this book The book reveals how ethics art and politics can be as true as the sciences that inform them Chemical News and Journal
