Delang,Yi Hang Yu,2015-06-26 Dissatisfaction with the Gross Domestic Product GDP as an indicator of a country s development or a population s wellbeing led to the development of the Genuine Progress Indicator GPI The GPI is an aggregate index of over 20 economic social and environmental indicators and accounts for both the welfare benefits of economic growth and the social and environmental costs which accompany that economic growth The result is better information about the level of welfare or well being of a country s population This book measures the GPI of Hong Kong and Singapore from 1968 to 2010 It finds that for both countries economic output as measured by the GDP has grown more than welfare as measured by the GPI but important differences are also found In Hong Kong the GPI has grown for the whole period under consideration while in Singapore the GPI has stalled from 1993 This is in line with most countries and is explained by the threshold hypothesis which states that beyond a certain level of economic development the benefits of further economic growth are outweighed by even higher environmental and social costs The book argues that the growth of Hong Kong s GPI is due to its favourable relationship with China and in particular its ability to export low wage jobs and polluting industries rather than successful domestic policies A stalling or shrinking GPI calls for alternative policies than the growth economy promoted by neoclassical economists and the book explores an alternative model that of the Steady State Economy SSE **Critical Translation Studies** Douglas Robinson,2017-02-17 This book offers an introduction for Translation Studies TS scholars to Critical Translation Studies CTS a cultural studies approach to the study of translation spearheaded by Sakai Naoki and Lydia H Liu with an implicit focus on translation as a social practice shaped by power relations in society The central claim in CTS is that translators help condition what TS scholars take to be the primal scene of translation two languages two language communities with the translator as mediator According to Sakai intralingual translation is primal we are all foreigners to each other making every address to another heterolingual thus a form of translation and it is the order that these acts of translation bring to communication that begins to generate the two separate languages scenario CTS is dedicated to the historicization of the social relations that create that scenario In three sets of Critical Theses on Translation the book outlines and explains and partly critiques the CTS approach in five interspersed chapters the book delves more deeply into CTS with an eye to making it do work that will be useful to TS scholars **273 technical questions and answers for job interview Offshore Oil & Gas Rigs** Petrogav International Oil & Gas Training Center,2020-06-30 The job interview is probably the most important step you will take in your job search journey Because it s always important to be prepared to respond effectively to the questions that employers typically ask at a job interview Petrogav International has prepared this eBooks that will help you to get a job in oil and gas industry Since these questions are so common hiring managers will expect you to be able to answer them smoothly and without hesitation This eBook contains 273 questions and answers for job interview and as a BONUS web addresses to 230 video movies for a better

This collection explores critical and visual practices through the lens of interactions and intersections between pattern and chaos. The dynamic of the inter relationship between pattern and chaos is such as to challenge disciplinary boundaries, critical frameworks and modes of understanding perception and communication often referencing the in between territory of art and science through experimentation and visual scrutiny. A territory of pattern chaos or chaos pattern begins to unfold. Drawing upon fields such as visual culture, sociology, physics, neurobiology, linguistics or critical theory for example, contributors have experimented with pattern and or chaos related forms, processes, materials, sounds and language or have reflected on the work of other artists, scientists and scholars. Diagrams, tessellations, dust knots, mazes, folds, creases, flux, virus, fire and flow are indicative of processes through which pattern and chaos are addressed. The contributions are organized into clusters of subjects which reflect the interdisciplinary terrain through a robust yet also experimental arrangement. These are: Pattern Dynamics, Morph Flux, Mutate, Decompose, Recompose, Virus, Social Imaginary and Nothings in Particular.

Virtues in the Public Sphere James Arthur, 2018-12-07. Virtues in the Public Sphere features seventeen chapters by experts from a variety of different perspectives on the broad theme of virtue in the public sphere. Spanning issues such as the notion of civic friendship and civic virtue, it sheds light on the role that these virtues play in the public sphere and their importance in safeguarding communities from the threats of a lack of concern for truth, poor leadership, charlatanry and bigotry. This book highlights the theoretical complexity of putting virtue ethics into practice in the public domain at a time when it has been shaken by unpredictable political, social, technological and cultural developments. With contributions from internationally acclaimed scholars in the fields of philosophy, psychology, sociology and education, this book highlights the main issues, both theoretical and practical, of putting virtue ethics into practice in the public domain. Split into three sections: Virtues and vices in the public sphere, Civic friendship and virtue, and Perspectives on virtue and the public sphere, the chapters offer a timely commentary on the roles that virtues have to play in the public sphere. This timely book will be of great interest to researchers, academics and post graduate students in the fields of education, character and virtue studies and will also appeal to practitioners.

Mobility and Ancient Society in Asia and the Americas Michael David Frachetti, Robert N. Spengler III, 2015-07-20. Mobility and Ancient Society in Asia and the Americas contains contributions by leading international scholars concerning the character, timing and geography of regional migrations that led to the dispersal of human societies from Inner and northeast Asia to the New World in the Upper Pleistocene ca. 20,000–15,000 years ago. This volume bridges scholarly traditions from Europe, Central Asia and North and South America, bringing different perspectives into a common view. The book presents an international overview of an ongoing discussion that is relevant to the ancient history of both Eurasia and the Americas. The content of the chapters provides both geographic and conceptual coverage of main currents in contemporary scholarly research, including case studies from Inner Asia, Kazakhstan, southwest Siberia, northeast Siberia and North and South America. The chapters consider the trajectories, ecology and social dynamics of ancient mobility.

communication and adaptation in both Eurasia and the Americas using diverse methodologies of data recovery ranging from archaeology historical linguistics ancient DNA human osteology and palaeoenvironmental reconstruction Although methodologically diverse the chapters are each broadly synthetic in nature and present current scholarly views of when and in which ways societies from northeast Asia ultimately spread eastward and southward into North and South America and how we might reconstruct the cultures and adaptations related to Paleolithic groups Ultimately this book provides a unique synthetic perspective that bridges Asia and the Americas and brings the ancient evidence from both sides of the Bering Strait into common focus

Eva Horn,Hannes Bergthaller,2019-09-11 The Anthropocene is a concept which challenges the foundations of humanities scholarship as it is traditionally understood It calls not only for closer engagement with the natural sciences but also for a synthetic approach bringing together insights from the various subdisciplines in the humanities and social sciences which have addressed themselves to ecological questions in the past This book is an introduction to and structured survey of the attempts that have been made to take the measure of the Anthropocene and explores some of the paradigmatic problems which it raises The difficulties of an introduction to the Anthropocene lie not only in the disciplinary breadth of the subject but also in the rapid pace at which the surrounding debates have been and still are unfolding This introduction proposes a conceptual map which however provisionally charts these ongoing discussions across a variety of scientific and humanistic disciplines This book will be essential reading for students and researchers in the environmental humanities particularly in literary and cultural studies history philosophy and environmental studies
