This book contains 38 papers authored by both scientists and practitioners focused on an interdisciplinary approach to the  
development of cyber physical systems Recently our civilization has been facing one of the most severe challenges in modern  
history The COVID 19 pandemic devastated the global economy and significantly disrupted numerous areas of economic  
activity Only radical increase of efficiency and versatility of industrial production with further limitation of human  
involvement paralleled by the decrease of environmental burden will enable us to cope with such challenges We hope that  
the presented book provides input to the solution of at least some problems brought about by this challenge This approach  
relies on the development of measuring techniques robotic and mechatronic systems industrial automation numerical  
modeling and simulation as well as application of artificial intelligence techniques required by the transformation leading to
