*White Paper on Human Rights in North Korea 2015* Do Kyung-ok, Kim Soo-Am, Han Dong-ho, Lee Keum-Soon, Hong Min, Korea Institute for National Unification (South Korea), 2015-09-24 The 2015 edition of the White Paper on Human Rights in North Korea marks the 20th year of the series since its first publication in 1996 This White Paper is based on in depth interviews with 221 of the 1 396 North Koreans who escaped to South Korea in 2014 These samples were selected with their demographic characteristics and social backgrounds taken into account Below are the key highlights of the survey In its national report for the Universal Periodic Review submitted to the United Nations UN Human Rights Council on January 30 2014 North Korea explained that death penalty is applied to extremely restricted cases In reality however North Korea has an extensive list of crimes punishable by the death penalty defined not just by the Criminal Law but also by its Addendum the death penalty may also be imposed by promulgations instructions and other alternative formats North Korean defectors who have witnessed the death penalty carried out in public have provided testimony that it has actually been given for a wide range of crimes Of special note is that over the last few years the number of people put to death for watching distributing South Korean video recordings or smuggling trafficking narcotics is on a remarkable rise This was widely observed in our 2014 survey too Human rights violations in ordinary prison camps kyohwaso labor training camps rodongdanryundae holding centers jipkyulso detention centers political prison camps kwanliso and other detention facilities are still known to be serious Inhumane treatment including torture and beatings are part of the daily routine nutrition medical care and hygiene are also very poor In our 2014 survey however some interviewees suggested that the human rights conditions in ordinary prison camps kyohwaso were improving somewhat North Korean defector XXX who was held for a long time at the Jongori kyohwaso where a massive number of violent incidents and human rights violations reportedly took place explained that beatings at the kyohwaso was on the decrease North Korean defector XXX who had been detained at the Jongori kyohwaso until recently said that strenuous effort was being made to bring fatal incidents under control as the reality of the human rights infringements at the kyohwaso were known to the outside world through former inmates Meanwhile the

2014 survey results include testimonies on those released from political prison camps kwanliso in 2012 and 2013 after Kim Jong un took over as the new leader of North Korea Witnesses explained that their release was based on Kim Jong un s policy that those who have one percent of a conscience are given a second chance despite 99 percent of their faults and that these people were released as Kim Jong un upon taking office told those whose crimes were motivated by personal grievance as opposed to criticism of the state should be freed which is within the context of his politics of law Similar cases can be found in North Korea s On site Open Trials System too Testimonies from North Korean defectors show that when On site Open Trials were conducted for a large number of people held for the same charge some of them are executed immediately in public as examples while others are found innocent and released allegedly due to Kim Jong un s consideration or policy While unleashing a reign of terror against the power elites the young leader seems to be seeking to present himself to ordinary citizens as a leader who loves the people Nonetheless the very fact that these measures are possible shows his policies and instructions have supra legal authority in North Korea A typical infringement on freedom of residence the practice of forced deportation is still found to be widespread North Korean defector XXX testified that in 2013 during his on site instructions in Musan Kim Jong un ordered transformation of the city boundaries into an exemplary area This led to the forced deportation of more than 600 households living within 300 meters of the city boundaries Such massive involuntary relocation was enforced primarily upon family members of illegal border crossers or those with criminal records such as illegal use of a mobile phone A number of testimonies also suggested that forced deportation has been on the increase since mid 2013 in Samjiyon County within which is the hometown of Kim Jong il In particular those whose parents are from rural areas former detainees at ordinary prison camps kyohwaso and their family members and illegal border crossers are first to be relocated According to the 2014 survey results little progress has been made in improving North Koreans rights to food and health When it comes to the right to food the total volume of food available has increased since 2010 but North Korea s discriminatory distribution policies has led to continued discrepancy among ordinary citizens in their access to food Collection of excessive amounts of produce from farm workers in particular has undermined their right to food on a continuous basis This seems partly attributable to the assignment of unrealistically high production quota and the falsification of distribution documents Excluded from the Public Distribution System PDS marginalized members of North Korean society tap into money offered by loan sharks to deal with the scarcity ending up suffering even more In the 2014 survey however a large number of interviewees said the public distribution supply has temporarily improved since 2012 as North Korean authorities released military provisions As for the right to health the uneven distribution of resources as a result of economic hardship and military first politics has destroyed the medical system as a whole The absolute lack of medicine and basic medical equipment has continued while some interviewees pointed out in the 2014 survey that an increasing amount of medicine was being provided by Jungsung Pharmaceuticals Meanwhile as the North s free treatment

system is not working properly patients in need of surgery often end up paying for the related costs for themselves The military ranks are also seeing their right to health deteriorating Some interviewees stated that the military was also short on medicine and not just civil society The community doctor system and other mechanisms of preventive medicine propagandized by the North Korean authorities are not functioning properly Community doctors are currently incapable of treating patients and can only issue medical certificates they are known to work primarily on vaccinations such as preventive injections against epidemics A large number of interviewees in the 2014 survey said that vaccination was being offered Vaccination seems to be improving efforts to prevent disease Areas receiving aid from the UN and other international actors also enjoy relatively better medical treatment Despite many constraints and the resulting shortcomings we hope that this White Paper will draw more attention at home and abroad to the issue of human rights in North Korean while contributing to domestic and international discussion and action on improving the situation

**Competition Law and Collusion in Public Procurement** Penelope Giosa, 2025-08-22 This book examines infringements of competition law in public procurement settings evaluating the latest European Procurement Directive 2014/24/EU to examine to what extent its provisions facilitate or deter collusion during specific award procedures Public contracts account for a significant proportion of EU expenditure In sectors such as energy transport social protection and the provision of health or education services public authorities are the main purchasers It is important to ensure that public contracts are awarded in an open fair and transparent manner that enables domestic and non domestic firms to compete on an equal basis with the aim of improving the quality and lowering the price of purchases made by public authorities This book assesses the competition law enforcement mechanisms that competition regulators bring to the area of public procurement in the attempt to deter bid rigging It analyzes key tools for the public and private enforcement of competition law in the domain of public contracts such as the leniency programme damages claims for bid rigging and the whistle blower programme The book uses auction theory as benchmark to assess the risk of collusion in the context of procurement procedures and techniques Offering a holistic analysis informed by research it makes recommendations for better design set up and management of public tenders without distorting competition

Highlighting the need to make use of competition law enforcement mechanisms in the battle against collusion in public procurement it identifies ways in which the procurement process can be improved to reduce and prevent bid rigging The book will be of interest to researchers in the field of competition law public procurement and EU law
