Syngellakis,U. Probstl-Haider,F. Pineda,2018-07-23* This volume includes papers from the 8th International Conference on Sustainable Tourism Today tourism is becoming accessible to a growing number of people and is an important component of development not only in economic terms but also for knowledge and human welfare This collection of research aims to find ways to protect the natural and cultural landscape through the development of new solutions which minimise the adverse effects of tourism The phenomenon has many more advantages than disadvantages New forms of economic development and increasing wealth of human societies depend on tourism Our knowledge of the world now includes a strong component due to tourism Human welfare has physiological and psychological elements which tourism promotes both because of the enjoyment of knowing new territories and increasing contacts with near or far away societies and cultures The tourism industry has nevertheless given rise to some serious problems including social costs and ecological impacts Many ancient local cultures have practically lost their identity Their societies have oriented their economy only to this industry Both the natural and cultural rural or urban landscapes have also paid a high price for certain forms of tourism These problems will persist if economic benefit is the only target leading to economic gains that eventually become ruinous It is

also a grave error to disregard the fact that visitors nowadays are increasingly demanding in cultural and environmental terms. The Global Change is a set of natural environmental changes that are strongly affected by technological and social developments. Natural changes are inherent in the Earth's ecosystem, the ecosphere. Also technological and social changes are inherent to mankind, the noosphere, and are now becoming widespread. Cities are growing rapidly and industry requires increasingly larger areas. Many traditional rural areas are being abandoned. Tourism should also play an important role in this context. Thus interestingly many historic agricultural districts have maintained or even recovered their local population numbers through intelligent strategies of tourism focused on nature and rural culture. Natural landscapes and biodiversity are becoming increasingly appreciated. The tourism industry must be able to respond to these aspirations.

The Affective Negotiation of Slum Tourism Tore Holst, 2018-01-29 Each year approximately a million tourists visit slum areas on guided tours as a part of their holiday to Asia, Africa or Latin America. This book analyses the cultural encounters that take place between slum tourists and former street children who work as tour guides for a local NGO in Delhi, India. Slum tours are typically framed as both tourist performances bought as commodities for a price on the market and as appeals for aid that tourists encounter within an altruistic discourse of charity. This book enriches the tourism debate by interpreting tourist performances as affective economies, identifying tour guides as emotional labourers and raising questions on the long-term impacts of economically unbalanced encounters with representatives of the Global North, including the researcher. This book studies the feeling rules governing a slum tour and how they shape interactions. When do guides permit tourists to exoticise the slum and feel a thrilling sense of disgust towards the effects of abject poverty, and when do they instead guide them towards a sense of solidarity with the slum's inhabitants? What happens if the tourists rebel and transgress the boundaries delimiting the space of comfortable affective negotiation constituted by the guides? This book will be essential reading for undergraduates, postgraduates and researchers working within the fields of Human Geography, Slum Tourism Research, Subaltern Studies and Development Studies.
