We will occasionally footnote a portion of text with a to indicate Notes on the that this portion can be initially bypassed The reasons for bypassing a Text portion of the text include the subject is a special topic that will not be referenced later the material can be skipped on first reading or the level of mathematics is higher than the rest of the text In cases where a topic is self contained we opt to collect the material into an appendix that can be read by students at their leisure The material in the text cannot be fully assimilated until one makes it Notes on their own by applying the material to specific problems Self discovery Problems is the best teacher and although

they are no substitute for an inquiring mind problems that explore the subject from different viewpoints can often help the student to think about the material in a uniquely personal way With this in mind we have made problems an integral part of this work and have attempted to make them interesting as well as informative
