Oxford Textbook of Cancer Biology Francesco Pezzella, Mahvash Tavassoli, David J. Kerr, 2019-05-05 The study of the biology of tumours has grown to become markedly interdisciplinary involving chemists statisticians epidemiologists mathematicians bioinformaticians and computer scientists alongside biologists geneticists and clinicians The Oxford Textbook of Cancer Biology brings together the most up to date developments from different branches of research into one coherent volume providing a comprehensive and current account of this rapidly evolving field Structured in eight sections the book starts with a review of the development and biology of multi cellular organisms how they maintain a healthy homeostasis in an individual and a description of the molecular basis of cancer development The book then illustrates as once cells become neoplastic their signalling network is altered and pathological behaviour follows It explores the changes that cancer cells can induce in nearby normal tissue the new relationship established between them and the stroma and the interaction between the immune system and tumour growth The authors illustrate the contribution provided by high throughput techniques to map cancer at different levels from genomic sequencing to cellular metabolic functions and how information technology with its vast amounts of data is integrated with traditional cell biology to provide a global view of the disease The effect of the different types of treatments on the biology of the neoplastic cells are explored to understand on the one side why some treatments succeed and on the other how they can affect the biology of resistant and recurrent disease The book concludes by summarizing what we know to date about cancer and in what direction our understanding of cancer is moving Edited by leading authorities in the field with an international team of contributors this book is an essential resource for scholars and professionals working in the wide variety of sub disciplines that make up today's cancer research and treatment community It is written not only for consultation but also for easy cover to cover reading

Sustainable Horticulture Development and Nutrition Security (Vol. 3) Prem Nath, 2018-01-01 We all are indebted to nature for providing us food and its resources for our subsistence and survival In the food domain cereal and legume grains occupy the front line whereas horticultural crops have occupied the second line of defense For healthy diet cereals and legumes provide us with carbohydrates and protein whereas fruits and vegetables provide us minerals and vitamins Both macro and micro nutrients are essential for human growth and development The fruits and vegetables are the major source of micro nutrients It is estimated that up to 2.7 million lives could potentially be saved each year if fruit and vegetable production was sufficiently increased Both at national and international levels food and agriculture horticulture development plans and estimates are basically developed framed and implemented and narrowed down to cereal production In the present context of attaining nutrition security this mode of thinking on food needs to be changed to nutrients which will include necessarily all those crops including fruit and vegetables which provide all macro and micro nutrients to ensure balanced nutrition needed for good human health The present publication has attempted to reflect and discuss the above views and ideas on the subject

of sustainable horticulture development and nutrition security in nine chapters with 32 articles by 32 authors **Cognitive Psychology** Sandie Taylor,Lance Workman,2021-09-15 Cognitive Psychology The Basics provides a compact introduction to the core topics in the field discussing the science behind the everyday cognitive phenomena experienced by us all The book considers laboratory and applied theory and research alongside technological developments to demonstrate how our understanding of the brain s role in cognition is improving all the time Alongside coverage of traditional topics in the field including attention and perception learning and memory thinking problem solving and decision making and language the book also discusses developments in interrelated areas such as neuroscience and computational cognitive science New perspectives including the contribution of evolutionary psychology to our understanding of cognition are also considered before a thoughtful discussion of future research directions Using real world examples throughout the authors explain in an accessible and student friendly manner the role our human cognition plays in all aspects of our lives It is an essential introductory text suitable for all students of Cognitive Psychology and related disciplines It will also be an ideal read for any reader interested in the role of the brain in human behavior Maternal and Child Health Nursing Adele Pillitteri,2013-11-25 Adele Pillitteri aims to ensure that today s students have a technical understanding without losing the importance of compassion in their role as a nurse The text presents pediatrics and maternity as a continuum of knowledge taking a holistic approach and viewing maternity and pediatric content as a family event The text links theory closely with application that helps students gain a deeper understanding of content and be better prepared to practice in their careers Provided by publisher
