They stopped sending their kids to school Michael Wenkart, 2014-04-09 Is homeschooling a reasonable alternative to the classical school system Estimates suggest there are at least 1.5m Americans who have turned to homeschooling for their children Whether this is due to a perceived failing in the state education system religious or political convictions or the need to accommodate some special need of the student or family it is an issue that causes controversy and undoubtedly raises very serious questions about the state of future generations of American citizens Advocates of the system claim it improves the education of the child shapes it more to their needs and aptitudes and leads to a more rounded individual experience Critics claim it undermines the public school system makes children more narrow and prejudiced in their outlook and doesn't offer any significant advantages academically So who is right As with all such debates there is a high degree of subjectivity involved when assessing claims and counterclaims It is difficult to substantiate or disprove a lot of these and not enough objective scientific research has been conducted to come up with conclusive results either way Many who have used the system are very happy with the results though they assert it is hard work and requires lots of commitment and often cost A few are honest enough to admit there are considerable drawbacks and that the concept is not suitable for everyone adults or children A lot of its critics are opposed to it on political grounds claiming it is a reactionary idea that breeds inequality and perpetuates right wing principles Others oppose the association with religious beliefs though there is no strong evidence that this is a major factor in most decisions to homeschool Homeschooling has had a long hard road to acceptance It has been equated with truancy and illegality and has been criticized and pilloried often by people who know little about it

Homeschooling Michael Wenkart, 2014-03-20 Estimates suggest there are around 1.5m Americans who have turned to homeschooling for their children and this is probably a significant underestimate Whether this is due to a perceived failing in the state education system religious or political convictions or the need to accommodate some special need of the student or family it is an issue that causes controversy and undoubtedly raises very serious questions about the state of future generations of American citizens Advocates of the system claim it improves the education of the child shapes it more to their needs and aptitudes and leads to a more rounded individual experience Critics claim it undermines the public school system makes children more narrow and prejudiced in their outlook and doesn't offer any significant advantages academically So who is right As with all such debates there is a high degree of subjectivity involved

when assessing claims and counterclaims It is difficult to substantiate or disprove a lot of these and not enough objective scientific research has been conducted to come up with conclusive results either way Many who have used the system are very happy with the results though they assert it is hard work and requires lots of commitment and often cost A few are honest enough to admit there are considerable drawbacks and that the concept is not suitable for everyone adults or children A lot of its critics are opposed to it on political grounds claiming it is a reactionary idea that breeds inequality and perpetuates right wing principles Others oppose the association with religious beliefs though there is no strong evidence that this is a major factor in most decisions to homeschool Homeschooling has had a long hard road to acceptance It has been equated with truancy and illegality and has been criticized and pilloried often by people who know little about it Its practitioners have been branded as kooks religious fanatics right wing pedagogues and many other things Some of these accusations might be founded but the average homeschooler is probably none of these In fact they are probably just that average Many will agree it is a parent s right to give their children the best possible education and it is an issue of choice freedom and independent thinking Whether this is largely beneficial or detrimental will ultimately be down to the perspective of individuals as they consider the pros and cons

Journal for Star Wisdom 2013 David Bowden,David Tresemer,William Bento,Wain Farrants,Brian Gray,Kevin Dann,Lacquanna Paul,Sally Nurney,2012-11 We must think with clarity Clarity is honesty born into thinking Massimo Scaligero Here is a classic of contemporary spirituality Scaligero was a student of Zen yoga and the spiritual science of Rudolf Steiner but he came to completely independent conclusions based on his direct spiritual experience Scaligero s masterpiece is a continuous unfolding meditation and an immediate expression of his travels in higher realms It shows how the primal principle the source of all being knowing and love descends instant by instant into the phenomenal world He writes from the very stream of being into which his work invites us and poses a challenge will we learn to experience the processes of consciousness or will we rest in their products As with the texts of all true spiritual masters Scaligero s words must be savored and contemplated in order to extract the nectar of wisdom contained in them
