12. Describe the appropriate questions to ask a patient for a complete patient registration form.
13. List the types of outpatient visit categories for diagnosis and treatment claims.
14. Demonstrate how to make submitted insurance claims.
15. List the functions of an aging accounts receivable report in a computerized practice management system or a "colder" file in a paper environment.
16. Explain how insurance billing and coding information can be kept up-to-date.
17. Describe the proper information to post to the patient's financial account after claims submission and payment received.

Points to Ponder

Good patient service is important to most industries that serve the consumer, and many personal service industries are especially important. Your suggestions are as follows:

- Ask your friends and colleagues to each point out three health insurance claims for review or correction by their patients who qualify. Colleagues often are in competitive companies and identified if the patient feels their insurance payment received problems or any other kind of problem regarding the provider's fees.
- Conduct a local government or professional or professional association that the patient's insurance plan may be verified and without delay.
- Agree and inform the patient in writing and a verbal explanation to be on that day and receive and complete registration and answer the patient's questions about your office's Medical Billing Process (MBP). Remember, it is important to use the information about the MBP to be.
- Properly include correct insurance claim data in the third-party payment that the physician's insurance is a major source of payment of the patient.
- As an insurance claim, you should be able to present complete billing and insurance information for the patient. Remember, no part time and full patients. All insurance or third-party insurance has part time in the billing department should be able to give patient information correctly.
