Saved by Venom Lolita Lopez, 2015-11-01 To escape her father's debt to a loan shark Dizzy seeks refuge in the upcoming Grab She'd rather belong to one of those terrifying sky warriors from the battleship Valiant than to the sleazy criminal who wants her as his plaything The years of constant war haven't been kind to highly decorated sniper Venom Only the promise of earning a wife kept him going through deadly battles Catching and collaring Dizzy fills him with incredible hope Finally he has a woman of his own a mate to love and bind and adorn with his ropes After a brazen Splinter attack the Shadow Force uncovers secrets about Dizzy's late mother that entangle her in a web of deceit To save Venom her father and an operative named Terror Dizzy digs deep and risks it all Venom refuses to stand idly by while Dizzy's haunted past threatens the future they're trying to build He finally has a reason for living and he's not giving her up , *Venomous* Christie

Wilcox, 2016-08-09 A thrilling tale of encounters with nature's masters of biochemistry From the coasts of Indonesia to the rainforests of Peru venomous animals are everywhere and often lurking out of sight Humans have feared them for centuries long considering them the assassins and pariahs of the natural world Now in *Venomous* the biologist Christie Wilcox investigates and illuminates the animals of our nightmares arguing that they hold the keys to a deeper understanding of evolution adaptation and immunity She reveals just how venoms function and what they do to the human body With Wilcox as our guide we encounter a jellyfish with tentacles covered in stinging cells that can kill humans in minutes a two inch caterpillar with toxic bristles that trigger hemorrhaging and a stunning blue ringed octopus capable of inducing total paralysis How do these animals go about their deadly work How did they develop such intricate potent toxins Wilcox takes us around the world and down to the cellular level to find out Throughout her journey Wilcox meets the intrepid scientists who risk their lives studying these lethal beasts as well as self immunizers who deliberately expose themselves to snakebites Along the way she puts her own life on the line narrowly avoiding being envenomated herself Drawing on her own research Wilcox explains how venom scientists are untangling the mechanisms of some of our most devastating diseases and reports on pharmacologists who are already exploiting venoms to produce lifesaving drugs We discover that venomous creatures are in fact keystone species that play crucial roles in their ecosystems and ours and for this alone they ought to be protected and appreciated Thrilling and surprising at every turn *Venomous* will change everything you thought you knew about the planet's most dangerous animals *The Alkaloidal Clinic*, 1903 *Venom's Taste* Lisa Smedman, 2010-04-21 New York Times
