		At the end of this unit, students will use what they have learned to independently... The Say it with Symbols unit will focus on making sense of symbolic expression and equations. Scholars will understand that there are different ways of reasoning about a situation that can lead to different but equivalent expressions. They will use mathematical properties of equality, distributive and communicative number properties to rewrite expressions. Using equivalent expressions, they will understand that problems can be thought about in different ways. Scholars will further develop their strategies to solve equations, including problems related to volumes of cylinders, cones and spheres. They will also continue their work using multiple representations, including graphs, tables, and symbolic representations.	
		Meaning	
		Enduring Understandings Students will understand that... Algebra provides ideas and symbols for expressing information about quantitative variables and relationships. Students will solve problems designed to develop their understanding and skill in symbolic expressions and equations. Students will understand (Equivalence) - How to represent patterns and relationships in symbolic form - Determining when different symbolic expression are mathematically equivalent - Writing algebraic expressions in useful equivalent forms - Combining symbolic expressions using algebraic operations to form new expressions - Solving linear equations using symbolic reasoning - Using algebraic reasoning to validate generalizations and conjecture (Functions) - Identifying and representing relationships expressed in problem contexts with linear and non linear functions and use these relationships to solve problems - How to analyze equations to determine the patterns of change in a table and graph that an equation	Essential Questions Students will consider such questions as...
