An Italian Journey Linda Wolk-Simon, Carmen Bambach, Stijn Alsteens, Metropolitan Museum of Art (New York, N.Y.), 2010 Published in conjunction with an exhibition on view at the Metropolitan Museum of Art New York May 12 Aug 15 2010 *The Antonio II Badile Album of Drawings: The Origins of Collecting Drawings in Early Modern Northern Italy*
Evelyn Karet, 2017-07-05 Evelyn Karet s in depth study of the Antonio II Badile Album the earliest known example of an art collection pasted onto the pages of a book is both focused and broad in its appeal to those interested in the early modern era The provenance of the album is traced from its assemblage to the seventeenth century collection of Conte Lodovico Moscardo to its dismantling by the dealer Francis Matthiesen in the 1950s establishing that the volume conserved in the Frits Lugt Collection is not an original but a replica produced by Matthiesen Although Antonio II must be celebrated as the collector of the drawings new paleographic analysis has identified the actual compiler of the album after Antonio s death providing a terminus post quem in the late 1530s or early 1540s Karet enlarges the focus from the album itself to the historic tradition of collecting drawings in northern Italy in the early modern era before Vasari for which the album provides a new point of reference Throughout the book Karet discusses the Badile family examines the individual drawings in the book investigates the contacts between artists and humanists their rich diverse collections and the humanist mind set that fostered the appreciation of drawings She explores notable early drawing collections in northern Italy and the role of northern Italy as a center of collection in the sixteenth and seventeenth centuries The book concludes with two appendices a reconstruction of the original album including a discussion of the reconstruction process suggestions about what the album originally looked like and a page by page guide to its contents and a detailed analysis of Francis Matthiesen s career This book opens up new areas of inquiry into an overlooked subject Differentiation Strategies for Science Wendy Conklin, 2009-12 Written specifically for science teachers at all levels this resource helps facilitate the understanding and process of writing differentiated lessons to accommodate all levels of learning and learning styles Includes a CD Domenico Ghirlandaio
Jeanne K. Cadogan, Domenico Ghirlandaio, 2000-01-01 Domenico Ghirlandaio was one of the most popular artists in fifteenth century Florence He worked in a variety of media including panel paintings wall murals mosaic and manuscript illumination

and his workshop to which Michelangelo was apprenticed was highly influential This beautiful book offers a radically new interpretation of Ghirlandaio's life and work viewing him primarily as an artisan active within the craft traditions guild structure and workshop organizations of his day Jean K Cadogan argues that Ghirlandaio was a pivotal figure in the transformation of the artist from medieval artisan to Renaissance genius She traces his gradual social elevation which reflected the increasing respect with which he was treated by his patrons And she notes that the changes in the way he and other artists were viewed created a milieu that encouraged innovation in technique style and content qualities that were vividly displayed in Ghirlandaio's work Cadogan explains how his working method his pragmatic artisan approach to technique the organization and functioning of his workshop and his relations with his patrons affected the works of art Ghirlandaio produced Her text is complemented by a catalogue raisonné of Ghirlandaio's works in all media as well as an appendix of documents useful for scholars

Making Math Connections Hope Martin, 2006-07-27 Making Math Connections integrates mathematics into a variety of subject areas and real life settings providing motivation for students to want to learn the material being presented. The book also uses a variety of activities to promote learning for students with different interests and learning styles. Steven P. Isaak, Mathematics Teacher, Advanced Technologies Academy, Las Vegas, NV. Spark student learning by making an authentic connection between math and real life experiences. Students often fail to make the connection between school math and their everyday lives, becoming passive recipients of isolated memorized rules and formulas. This remarkable new resource will help students become active problem solvers who see mathematics as a meaningful tool that can be used outside the classroom. Hope Martin applies more than 40 years of teaching experience to developing a myriad of high interest, meaningful math investigations. Using a teacher-friendly format, she shows educators how to integrate into the math curriculum engaging everyday topics such as forensics, natural disasters, tessellations, the stock market, and literature. This project-based resource encourages cooperative, interactive learning experiences that not only help students make connections between various math skills but also make important connections to the real world. Aligned to NCTM standards, these mathematical applications are broken down into complete units focusing on different topics. Each chapter includes background information on the topic, step-by-step procedures for math investigations, assessment strategies, journal questions, reproducible worksheets, additional related readings, and Internet Web sites. By increasing their awareness of meaningful everyday applications, students will learn to use math as an essential tool in their daily lives. *Curricula for Students with Severe Disabilities* Phyllis Jones, 2017-03-16 Students with severe disabilities comprise 2 percent of the population of learners who are impacted by intellectual, communicative, social, emotional, physical, sensory, and medical issues. Increasingly, however, teachers are required to meet the challenges of creating a pedagogical balance between an individual student's strengths, needs, and preferences and core academic curricula. The need to embrace the current initiative of curriculum state standards in the debate of curricula relevance, breadth, balance, and depth for students with severe disabilities is not just timely; it contributes to the evolving debate of what constitutes an appropriate curriculum for severely disabled learners. *Curricula for Students with Severe Disabilities* supports the development of greater understandings of the role that state curriculum standards play in the pedagogical decision making for students with severe intellectual disabilities. The book first discusses the nature and needs of these students, the curriculum for this group of learners, and the recent contributions of state curriculum standards before presenting narratives of real classrooms, teachers, and students who have meaningfully integrated state curriculum standards at the kindergarten, elementary, and high school levels.
