Search for information is no longer exclusively limited within the native language of the user but is more and more extended to other languages This gives rise to the problem of cross language information retrieval CLIR whose goal is to find relevant information written in a different language to a query In addition to the problems of monolingual information retrieval IR translation is the key problem in CLIR one should translate either the query or the documents from a language to another However this translation problem is not identical to full text machine translation MT the goal is not to produce a human readable translation but a translation suitable for finding relevant documents Specific translation methods are thus required The goal of this book is to provide a comprehensive description of the specific problems arising in CLIR the solutions proposed in this area as well as the remaining problems The book starts with a general description of the monolingual IR and CLIR problems Different classes of approaches to translation are then presented approaches using an MT system dictionary based translation and approaches based on parallel and comparable corpora In addition the typical retrieval effectiveness using different approaches is compared It will be shown that translation approaches specifically designed for CLIR can rival and outperform high quality MT systems Finally the book offers a look into the future that draws a strong parallel between query expansion in monolingual IR and query translation in CLIR suggesting that many approaches developed in monolingual IR can be adapted to CLIR The book can be used as an introduction to CLIR Advanced readers can also find more technical details and discussions about the remaining research challenges in the future It is suitable to new researchers who intend to carry out research on CLIR

Mounce's Complete Expository Dictionary of Old and New Testament Words William D. Mounce, 2009-12-15 For years Vine's Expository Dictionary has been the standard word study tool for pastors and laypeople selling millions of copies. But sixty plus years of scholarship have shed extensive new light on the use of biblical Greek and Hebrew creating the need for a new more accurate more thorough dictionary of Bible words. William Mounce whose Greek grammar has been used by more than 100 000 college and seminary students is the editor of this new dictionary which will become the layperson's gold standard for biblical word studies. Mounce's is ideal for the reader with limited or no knowledge of Greek or Hebrew who wants greater insight into the meanings of biblical words to enhance Bible study. It is also the perfect reference for busy pastors needing to quickly get at the heart of a word's meaning without wading through more technical studies. What makes Mounce's superior to Vine's? The most accurate in depth definitions based on the best of modern evangelical scholarship. Both Greek and Hebrew words are found under each English entry. Vine's separates them. Employs both Strong's and G K numbering systems. Vine's only uses Strong's. Mounce's accuracy is endorsed by leading scholars. **Caxton head**
