Nov 2013 HI P2 Q 4

Brendan G. Carr

Nov 2013 HI P2 Q 4:

The SAGE Handbook of Research in International Education Mary Hayden, Jack Levy, Jeff Thompson, 2015-10-13 The landscape of international education has changed significantly in the last ten years and our understanding of concepts such as international global and multicultural are being re evaluated Fully updated and revised and now including new contributions from research in South East Asia the Middle East China Japan Australasia and North America the new edition of this handbook analyses the origins interpretations and contributions of international education and explores key contemporary developments including internationalism in the context of teaching and learning leadership standards and quality in institutions and systems of education the promotion of internationalism in national systems This important collection of research is an essential resource for anyone involved in the practice and academic study of international education including researchers and teachers in universities governmental and private curriculum development agencies examination authorities administrators and teachers in schools

Cellular and molecular mechanisms of motor neuron death in amyotrophic lateral sclerosis Ricardo Tapia, 2015-02-11 Amyotrophic lateral sclerosis ALS which was described since 1869 by Jean Martin Charcot is a devastating neurodegenerative disease characterized by the selective and progressive loss of upper and lower motor neurons of the cerebral cortex brainstem and the spinal cord The cognitive process is not affected and is not merely the result of aging because may occur at young ages The only known cause of the disease is associated with genetic mutations mainly in the gene encoding superoxide dismutase 1 familial ALS whereas there is no known cause of the sporadic form of ALS SALS which comprises 90% of cases Both ALS types develop similar histopathological and clinical characteristics and there is no treatment or prevention of the disease Because effective treatments for ALS as for other neurodegenerative diseases can only result from the knowledge of their cellular and molecular pathophysiological mechanisms research on such mechanisms is essential Although progress in neurochemical physiological and clinical investigations in the last decades has identified several mechanisms that seem to be involved in the cell death process such as glutamate mediated excitotoxicity alterations of inhibitory circuits inflammatory events axonal transport deficits oxidative stress mitochondrial dysfunction and energy failure the understanding of the origin and temporal progress of the disease is still incomplete and insufficient Clearly there is a need of further experimental models and approaches to discern the importance of such mechanisms and to discover the factors that determine the selective death of motor neurons characteristic of ALS in contrast to other neurodegenerative diseases such as Parkinson s and Alzheimer s disease Whereas studies in vitro in cell cultures tissue slices or organotypic preparations can give useful information regarding cellular and molecular mechanisms the experiments in living animal models obviously reflect more closely the situation in the human disease provided that the symptoms and their development during time mimics as close as possible those of the human disease It is necessary to correlate the experimental findings in vitro with those in vivo as well as those

obtained in genetic models with those in non genetic models aiming at designing and testing therapeutic strategies based on the results obtained

Cumulated Index Medicus ,1998

ATP-gated P2X receptors in health and disease Andrea Nistri,Geoffrey Burnstock,Baljit S Khakh,Rashid Giniatullin,2015-01-05 Extracellular ATP is currently recognized as one of the most widely distributed neurotransmitters and neuromodulators in the peripheral and central nervous system ATP gated P2X receptors are expressed by neurons glial and many other non neuronal cells and represent an attractive target for therapeutic interventions Diverse molecular and cellular mechanisms have been identified for P2X receptor functioning including the ability to enlarge the size of the ion pore associated with the release of several key immune molecules A major recent breakthrough was the determination of the X ray crystal structures of zebrafish P2X4 receptor in ATP bound and ATP free states The P2X receptor research field is rapidly growing as evidenced by the almost 2000 papers published in the last 5 years However despite the fundamental signalling function of extracellular ATP in the nervous system the widespread roles of P2X receptors have not been widely elucidated and presented in textbooks In this volume of papers we aim to gather a collection of high quality papers detailing the latest insights from the most accomplished international P2X receptor researchers Importantly basic research into P2X receptors has a strong translational impact and our collection of articles could be a valuable guide for the development of new pharmacological and biotechnological tools addressing the function of P2X receptors Within this collection we plan to cover receptor structure function relationships receptors trafficking to highlight the special properties of P2X receptors and their pharmacological profiles and to describe the translational aspects of cellular ATP signaling in pain and in other neurological and vascular diseases

Electoral Politics in Post-1997 Hong Kong Stan Hok-Wui Wong,2015-03-29 This book offers a novel and parsimonious framework to help understand Hong Kong s lengthy democratic transition by analyzing the electoral dynamics of the city s competitive authoritarian political system where pro Beijing and pro democracy parties have struggled to keep each other in check The author demonstrates how a relatively liberal media environment has shaped the electoral incentives of the opposition and the pro establishment elite differently which has helped the latter improve its basis of electoral support The political explanation the book puts forward seeks to shed new light on why many autocracies are interested in regularly holding elections that are considered somewhat competitive This book will be of great interest not only to specialists in comparative studies of democratization but also to all those concerned with Hong Kong s democratic transition

Index Medicus ,2003 Vols for 1963 include as pt 2 of the Jan issue Medical subject headings

Disability Representation in Film, TV, and Print Media Michael S. Jeffress,2021-08-19 Using sources from a wide variety of print and digital media this book discusses the need for ample and healthy portrayals of disability and neurodiversity in the media as the primary way that most people learn about conditions It contains 13 newly written chapters drawing on representations of disability in popular culture from film television and print media in both the Global North and the Global South including the United States Canada India and Kenya Although disability

is often framed using a limited range of stereotypical tropes such as victims supercrips or suffering patients this book shows how disability and neurodiversity are making their way into more mainstream media productions and publications with movies television shows and books featuring prominent and even lead characters with disabilities or neurodiversity Disability Representation in Film TV and Print Media will be of interest to all scholars and students of disability studies cultural studies film studies gender studies and sociology more broadly

The Mechanism on Development and Regeneration of Inner Ear Hair Cells Dongdong Ren,Hongzhe Li,Yu Sun,2022-09-20

Extremophiles for Sustainable Agriculture and Soil Health Improvement Anuj Ranjan,Vishnu D. Rajput,Abhishek Chauhan,Evgeniya Valer'evna Prazdnova,Tatiana Minkina,Sajad Majeed Zargar,2024-11-15 This volume presents recent biotechnological advances in the application of extremophiles in sustainable agricultural production plant health and soil remediation It highlights the physiology and biochemistry of extremophiles to ensure their survival and adaptation under stressful agricultural conditions as well as their ecological diversity and taxonomical attributes that allow them to be useful in improving abiotic and biotic tolerance among crops The chapters cover genomic metagenomic and metabolomic approaches for improving crop production biocontrol nutrient solubilization and soil health to ensure food and nutrition security in a sustainable manner in difficult growing environments The book will be useful for students and researchers studying soil and plant management sustainable agriculture microbiology and biochemistry

Comprehensive Geographic Information Systems ,2017-07-21
Geographical Information Systems Three Volume Set is a computer system used to capture store analyze and display information related to positions on the Earth s surface It has the ability to show multiple types of information on multiple geographical locations in a single map enabling users to assess patterns and relationships between different information points a crucial component for multiple aspects of modern life and industry This 3 volumes reference provides an up to date account of this growing discipline through in depth reviews authored by leading experts in the field VOLUME
