**Business Challenges in the Changing Economic Landscape - Vol. 1** Mehmet Huseyin Bilgin,Hakan Danis,Ender Demir,Ugur Can,2015-10-29 This book is the first of the two volumes featuring selected articles from the 14th Eurasia Business and Economics conference held in Barcelona Spain in October 2014 Peer reviewed articles in this first volume present latest research breakthroughs in the areas of Accounting Corporate Governance Finance and Banking Institutional and International Economics and Regional Studies The contributors are both distinguished and young scholars from different parts of the World **Exploring the Role of Visualization in Climate Change Communication - an Audience**

**Perspective** Anne Gammelgaard Ballantyne,2018-05-08 Climate change communication is a topical and relevant issue and it is widely acknowledged that public communication about causes impacts and action alternatives is integral to addressing the challenges of the changing climate Climate visualization concerns the communication of climate information and data through the use of different information technologies and different modes of visual representation In the context of climate change communication climate visualization is highlighted as a potential way of increasing public engagement with climate change In particular developments within information technology have provided significant advancements that are claimed to be transformative in engaging lay audiences with issues relating to the mitigation of and adaptation to climate change Nevertheless there is a lack of research exploring climate visualization from an audience perspective This thesis addresses this gap The overarching aim is thus to explore the role of climate visualization in climate change communication from an audience perspective focusing specifically on how lay audiences make meaning of climate change as represented in two examples of climate visualization In addition the thesis discusses the potential contributions and or limitations of climate visualization from a communication perspective Based on a social semiotic theoretical framework this thesis employs focus group interviews to study participants meaning making related to two cases of climate visualization a dome theatre movie developed for Swedish high school students with the aim of encouraging reflection on climate change causes impacts and mitigation alternatives and a web based tool for climate change adaptation developed to assist Nordic homeowners in adapting to the local impacts of climate change The results of this thesis show that climate visualization can help audiences concretize otherwise abstract aspects of climate change and that the localized focus can make climate change appear more personally relevant and interesting for targeted audiences Nevertheless despite these communicative qualities the analyses also show that participants interpretations are shaped by their preconceptions of climate change as a global and distant issue to be solved by other actors such as national governments or through international policy negotiations Although climate visualization can enhance a sense of proximity with climate change the localization of climate risk can also lead to participants downplaying the significance of climate impacts In addition despite the intentions of inducing a sense of agency in both cases of climate visualization participants critically negotiated messages concerning their roles as individuals in

mitigating or adapting to climate change and assigned this responsibility onto other actors. These findings show that although climate visualization presents certain communicative qualities it is not a panacea for engaging lay audiences with climate change. This also underlines the importance of considering cultural and social aspects of the communicative event when studying and developing climate visualization tools as a means of communication.

Kommunikation kring klimat förändringar är ett aktuellt och relevant mne och många bedömare anser att kommunikation kring orsaker effekter och möjliga alternativ är en viktig del i arbetet med att mota klimatutmaningarna. Klimatvisualisering är en process för att skildriga klimatinformation och klimatdata med hjälp av olika tekniker och metoder för visuell framställning. I forskningslitteraturen om klimatkommunikation lyfts visualisering fram som ett möjligt sätt att öka allmänhetens engagemang i klimatfrågan. I synnerhet har utvecklingen inom informationsteknik lett till betydande framsteg som kan ses som omvälvande när det gäller att engagera lekarna i frågor som rör utsläppsminskningar och klimatanpassning. Det är dock brist på forskning om klimatvisualisering ur ett mottagarperspektiv. Denna avhandling adresserar denna kunskapslucka. Det övergripande syftet är att utforska visualiseringens roller i klimatkommunikation ur ett mottagarperspektiv med särskilt fokus på hur lekarna tolkar innebörden av klimatförändringar såsom de representeras i tv-exempel på klimatvisualisering. Avhandlingen behandlar även klimatvisualiseringens möjliga bidrag och eller begränsningar ur ett kommunikationsperspektiv. Med utgångspunkt i ett teoretiskt ramverk som inspirerats av socialsemiotiska teorier genomfördes fokusgruppsstudier för att studera deltagarnas meningsskapande i relation till tv-exempel på klimatvisualisering, en film som visas i en domsteater framtagen för svenska gymnasieelever med målsättningen att uppmuntra till reflektion kring klimatförändringarnas orsaker effekter och alternativ för utsläppsminskning samt ett webbaserat verktyg för klimatanpassning som utvecklats för att stödja husgärd i Norden att anpassa sig till klimatförändringarnas lokala effekter. Resultaten av denna avhandling visar att klimatvisualisering kan stödja mottagarna att konkretisera annars abstrakta aspekter av klimatförändringar och att ett lokalt fokus kan för klimatförändringarna att framstå som mer personligt relevanta och intressanta för målgruppen. Dock visar analyserna även trots dessa kommunikativa kvaliteter att deltagarnas tolkningar formas av deras förförståelse om klimatförändringar som ett globalt och avlägset problem som ska lösas av andra aktörer såsom nationella regeringar eller genom internationella politiska förhandlingar. Även om klimatvisualisering kan förstås som en inslag till klimatförändringar kan lokaliseringen av klimatriskerna även leda till att deltagare tonar ned de lokala klimatriskernas betydelse. Dessutom trots att både fallen av klimatvisualisering avseende att skapa en känsla av att kunna påverka blev ansvaret för klimatförändringar förblev för kritisk förhandling från deltagarnas sida de förlade ansvaret för att hantera klimatutmaningarna till andra aktörer. Dessa resultat visar att klimatvisualisering visserligen har vissa kommunikativa kvaliteter men inte någon patentlösning för klimatkommunikation. Detta understryker även vikten av att ta hänsyn till kulturella och sociala aspekter av den kommunikativa handlingen när man studerar och utvecklar verktyg för klimatvisualisering.

**Radicalized** Peter R. Neumann, 2016-09-30 The attacks in Paris in January and November 2015

heralded the beginning of a new wave of terrorism one rooted in the ongoing conflict in Syria and Iraq As ISIS seeks to expand its reach in the Middle East its territory serves as a base for training and operations for a new generation of jihadis Thousands of young people from the West primarily from Europe have travelled to join ISIS re emerging as hardened fighters with military training and a network of international contacts Many of these have now returned to their homelands where it is feared they are planning a new series of brutal attacks Peter R Neumann here explains the phenomenon of the new jihadis and shows why the threat of terrorism in the West is greater than ever before Based on interviews and previously unseen material Neumann provides an essential introduction to one of the greatest crises of our time India's Emerging Energy Relations Girijesh Pant,2015-10-09 This book analyzes the role of energy in Indian foreign policy particularly in defining bilateral relations It also focuses on the critical gaps in conceptualizing its formulations and recommends a framework for sustainable energy security India the fourth largest consumer of oil is an energy deficit economy importing more than eighty percent of its needs This makes securing energy integral to its foreign policy goals Obviously it is important for India to actively participate in the global energy market and establish robust enduring and nuanced diplomatic relations with energy exporting countries Equally important is that India diversifies its energy mix and moves towards carbon free growth Renewable energy is today high on the global energy agenda Indian energy policy thus has to address a range of issues domestically and on foreign turf It has to move beyond the transactional mode by creating equity in the global energy industry Today the global energy regime is undergoing fundamental changes as is the power dynamics of the global energy order There are now many new producers and diverse consumers The trade in energy has increased in volume and its direction has shifted from the West to the East and the ongoing structural changes in the energy market call for a new security architecture Given the complex and competitive environment of the new geo economics and geopolitics of energy the question could well be should India frame energy issues in conflict mode or move toward innovative cooperation In either case the message is that India needs an integrated energy security policy Georgetown Journal of International Affairs, Winter/Spring 2015 Anna Newby,Georgia Pelletier,2015-03-11 The Georgetown Journal of International Affairs is the official publication of the Edmund A Walsh School of Foreign Service at Georgetown University Each issue of the journal provides readers with a diverse array of timely peer reviewed content penned by top policymakers business leaders and academic luminaries The Journal takes a holistic approach to international affairs and features a Forum that offers focused analysis on a specific key issue with each new edition of the publication as well as nine regular sections Books Business Economics Conflict Security Culture Society Law Ethics A Look Back Politics Diplomacy Science Technology and View from the Ground Green Jobs for Sustainable Development Ana-Maria Boromisa,Sanja Tišma,Anastasya Ležaić,2015-06-26 A green economy must be built on green jobs the kind of employment that is low carbon intended to reduce energy use and expected to restore environmental quality But attempts to define exactly what a green job is have led to varied and often contradictory answers

There are many unresolved questions including whether we consider jobs in the nuclear fuel industry to be green jobs Or is a worker at a glass making company which supplies the glass for the solar photovoltaic industry doing a green job given that glass making is a dirty industry This book deals with the relationship between green concepts green jobs green economy green growth and sustainable development It examines to which extent creation of green jobs supports overall economic development as opposed to creation of elitist jobs and greenwashing In order to do so general conceptual frameworks for green jobs green economy green growth and green policy are presented as well as their implementation in ten countries selected among the Group of Twenty The selection includes advanced the European Union the United States of America Australia Canada Republic of Korea Japan and developing countries Mexico China Turkey and Brazil The analysis presented in this book shows that although green concept is well intentioned its implementation depends on local circumstances economic political and social Developed countries perceive green growth as a way to create new markets and demand while developing countries rely more on labor intensive growth and less expensive green jobs Thus greening the economy does not diminish differences between rich and poor This book is suitable for those who study and work in Ecological Economics Sustainable Development and Labor Economics [DRHA2014 Proceedings / Full Papers](#) Anastasios Maragiannis,2015-08-12 This publication includes a selection of peer reviewed academic papers The FULL PAPER Proceedings publication for the DRH2014 conference showcase up to date discussions dynamic debates and innovative keynotes and aims to open a discussion on defining digital communication futures as a theme that connects interdisciplinary practices focusing particularly on issues of communication and its impact on creative industries [Selected Topics in Power, RF, and Mixed-Signal ICs](#) Yan Lu,Chi-Seng Lam,2017-12-18 Selected Topic in Power RF and Mixed Signal ICs provides a practical overview and state of the art advancements on several selected topics in the areas of power RF and mixed signal integrated circuits and systems **Handbook on Green Infrastructure** Danielle Sinnett,Nick Smith ,Sarah Burgess,2015-11-27 Green infrastructure encompasses many features in the built environment It is widely recognised as a valuable resource in our towns and cities and it is therefore crucial to understand create protect and manage this resource This Handbook sets the context for green infrastructure as a means to make urban environments more resilient sustainable liveable and equitable Including state of the art reviews that summarise the existing knowledge as well as research findings this Handbook provides current evidence for the beneficial impact of green infrastructure on health environmental quality and the economy It discusses the planning and design of green infrastructure as a strategic network down to the individual features in a neighbourhood and looks at the process of green infrastructure implementation emphasising the importance of collaboration across multiple professions and sectors This comprehensive volume operates at multiple spatial scales from strategic networks at the regional level to individual features in neighbourhoods with international case studies used throughout to illustrate key examples of good practice This collection of expert contributions will be invaluable to students and academics

in the fields of planning urban studies and geography Practitioners and policy makers will also find the policy discussion and examples enlightening

**Kyrgyzstan - Regime Security and Foreign Policy** Kemel Toktomushev,2016-10-04 Kyrgyzstan is an interesting example of a relatively weak state which for its brief period of independence has already ousted two presidents experienced two revolutions survived two interethnic conflicts and yet remained intact This book explores this apparent paradox and argues that the schism between domestic and international dimensions of state and regime security is key to understanding the nature of Kyrgyz politics The book shows how the foreign policy links to the Manas Air Base used by the US military and essential for supplying their forces in Afghanistan the economic arrangements necessary for sustaining the base both inside and outside Kyrgyzstan and the myriad of different actors involved in all this combined to overshadow points of friction to ensure stable continuance of the status quo Overall the book shows how broad geopolitical forces and complex local factors together have a huge impact on the formation of Kyrgyz foreign policy
