Hayes,2017-12-14 Home to close to 60 per cent of the world s

population Asia is the largest and by far the most populous continent. It is also extremely diverse physically and culturally. Asian countries and regions have their own distinctive histories, cultural traditions, religious beliefs, and political systems, and they have often pursued different routes to development. Asian populations also present a striking array of demographic characteristics and stages of demographic transition. This handbook is the first to provide a comprehensive study of population change across the whole of Asia. Comprising 28 chapters by more than 40 international experts, this handbook examines demographic transitions on the continent, their considerable variations, their causes and consequences, and their relationships with a wide range of social, economic, political, and cultural processes. Major topics covered include population studies and sources of demographic data, historical demography, family planning and fertility decline, sex preferences, mortality changes, causes of death, HIV/AIDS, population distribution and migration, urbanization, marriage and family, human capital and labour force, population ageing, demographic dividends, political demography, population and environment, and Asia's demographic future. This handbook provides an authoritative and comprehensive reference for researchers, policymakers, academics, students, and anyone who is interested in population change in Asia and the world.

The Morality of Radical Economics Ron P. Baiman, 2016-08-31. This book is in equal parts a treatise on morality and economics, a critique of neoclassical orthodoxy, a brief for replacing mainstream economics with a radical political economics, and an argument for the abandonment of neoliberal capitalism in favor of democratic socialism. It includes a detailed proposal for a demand and cost alternative to supply and demand analysis and an in-depth technical critique of both neoclassical high theory and applied microeconomic analysis, demonstrating that these are not only infeasible or immoral but have directly contributed to public policy disasters. Further, the book suggests that only a moral economics in the form of radical political economy can address the looming economic and environmental crises of today's world. Baiman begins with an introduction to morality and ethics in both general sciences and in economics in particular. He then guides readers through evidence of how neoclassical economics has not only failed to remain objective and value-free but has become an ideology of apologetics protecting an immoral system. In addition to breaking down real-world examples to demonstrate his assertions, Baiman analyzes a theoretical Utopia design exercise. He concludes by arguing that the only form of economics that supports widely shared human values such as social equity, democracy, and solidarity is so-called radical economics, and that all true economics science should be directed toward achieving more socially productive economic activity. An invaluable guide to morality and economics, this book will appeal to researchers and teachers looking to change the way we think about economics, policy, and society.

Regional Dynamics in a Decentralized Indonesia Hal Hill, 2014-05-20. Indonesia is the world's largest archipelagic state. In 2001, it embarked on a big bang decentralization involving a major transfer of administrative, political, and financial authority to its districts, now numbering more than 500. Together with the rapid transition from authoritarian to democratic rule in the late 1990s, this initiative has transformed the country's political, social, and business life. While national government is the major

area of contestation power has shifted irreversibly away from the centre How this significantly increased regional autonomy works will have a crucial bearing on the future of the Indonesian nation state This volume features contributions by over 40 writers with deep expertise on Indonesia The book provides a timely comprehensive and analytical assessment of the country's regional development dynamics in the post decentralization environment It explores historical political and development patterns at the regional level the relationship between decentralization and governance local level perspectives migration cities and connectivity and the challenges confronting the peripheral regions of Aceh and Papua

Handbook of the Sociology of Education in the 21st Century Barbara Schneider, 2018-10-10 This handbook unifies access and opportunity two key concepts of sociology of education throughout its 25 chapters It explores today's populations rarely noticed such as undocumented students first generation college students and LGBTQs and emphasizing the intersectionality of gender race ethnicity and social class Sociologists often center their work on the sources and consequences of inequality This handbook while reviewing many of these explanations takes a different approach concentrating instead on what needs to be accomplished to reduce inequality A special section is devoted to new methodological work for studying social systems including network analyses and school and teacher effects Additionally the book explores the changing landscape of higher education institutions their respective populations and how labor market opportunities are enhanced or impeded by differing postsecondary education pathways Written by leading sociologists and rising stars in the field each of the chapters is embedded in theory but contemporary and futuristic in its implications This Handbook serves as a blueprint for identifying new work for sociologists of education and other scholars and policymakers trying to understand many of the problems of inequality in education and what is needed to address them

U.S. Freight Rail Economics and Policy Jeffrey Macher, John Mayo, 2019-04-25 The passage of the Staggers Rail Act in 1980 led brought a renaissance to the freight rail industry In the decade following economists documented the effects of the Act on a variety of important economic metrics including prices costs and productivity Over the preceding years and with the return of the industry to more stable footing attention to the industry by economists faded The lack of attention however has not been due to a dearth of ongoing economic and policy

issues that continue to confront the industry In this volume we begin to rectify this inattention Rather than retread older analyses or provide yet another look at the consequences of Staggers we assemble a collection of ten chapters in four sections that collectively provide fresh and up to date analyses of the economic issues and policy challenges the industry faces the first section sets the context through foundational discussion of freight rail the second section highlights the role of freight rail in an increasingly interrelated economy the third section examines industry structure and scope in freight rail and the fourth section assesses current regulatory challenges that confront freight rail This book will be of great value to researchers academics policymakers and students interested in the fields of freight rail economics and policy transportation business history and regulatory economics Proceedings of the 2022 International Conference on Economics, Smart Finance and Contemporary Trade (ESFCT 2022) Faruk Balli,Au Yong Hui Nee,Sikandar Ali Qalati,2023-12-19 This is an open access book As a leading role in the global megatrend of scientific innovation China has been creating a more and more open environment for scientific innovation increasing the depth and breadth of academic cooperation and building a community of innovation that benefits all Such endeavors are making new contributions to the globalization and creating a community of shared future To adapt to this changing world and China s fast development in the new era The 2022 International Conference on Economics Smart Finance and Contemporary Trade to be held in July 2022 This conference takes bringing together global wisdom in scientific innovation to promote high quality development as the theme and focuses on cutting edge research fields including Economics Smart Finance and Contemporary Trade This conference aims to boost development of the Greater Bay Area expand channels of international academic exchange in science and technology build a sharing platform of academic resources promote scientific innovation on the global scale strengthen academic cooperation between China and the outside world enhance development of new energy and materials and IT AI and biomedicine industries It also aims to encourage exchange of information on frontiers of research in different areas connect the most advanced academic resources in China and the world turn research results into industrial solutions and bring together talents technologies and capital to boost development The Complete Book of Colleges, 2013 Edition Princeton Review,2012-08-07 Profiles every four year college in the United States providing detailed information on academic programs admissions requirements financial aid services housing athletics contact names and campus life *Breaking Ranks* Colin Diver,2022-04-12 Some colleges will do anything to improve their national ranking That can be bad for their students and for higher education Since U S News World Report first published a college ranking in 1983 the rankings industry has become a self appointed judge declaring winners and losers among America s colleges and universities In this revealing account Colin Diver shows how popular rankings have induced college applicants to focus solely on pedigree and prestige while tempting educators to sacrifice academic integrity for short term competitive advantage By forcing colleges into standardized best college hierarchies he argues rankings have threatened the institutional diversity intellectual rigor

and social mobility that is the genius of American higher education As a former university administrator who refused to play the game Diver leads his readers on an engaging journey through the mysteries of college rankings admissions financial aid spending policies and academic practices He explains how most dominant college rankings perpetuate views of higher education as a purely consumer good susceptible to unidimensional measures of brand value and prestige Many rankings he asserts also undermine the moral authority of higher education by encouraging various forms of distorted behavior misrepresentation and outright cheating by ranked institutions The recent Varsity Blues admissions scandal for example happened in part because affluent parents wanted to get their children into elite schools by any means necessary Explaining what is most useful and important in evaluating colleges Diver offers both college applicants and educators a guide to pursuing their highest academic goals freed from the siren song of the best college illusion Ultimately he reveals how to break ranks with a rankings industry that misleads its consumers undermines academic values and perpetuates social inequality
