2.1.1 Starts from rest/ $0 \text{ m}\cdot\text{s}^{-1}$ ✓
 Velocity increases at a constant rate ✓
 until he reaches $2,5 \text{ m}\cdot\text{s}^{-1}$ after 25 s. ✓

OR
 Starts from rest/ $0 \text{ m}\cdot\text{s}^{-1}$ ✓
 Constant positive acceleration ✓
 until he reaches $2,5 \text{ m}\cdot\text{s}^{-1}$ after 25 s. ✓

(3)

2.1.2 Constant/uniform velocity ✓
 for another 25 s. ✓

OR
 Zero/No acceleration ✓
 for another 25 s. ✓

OR
 Velocity remains $2,5 \text{ m}\cdot\text{s}^{-1}$ in the
 direction of motion ✓
 for another 25 s. ✓

(2)

2.2.1 $acceleration = \frac{\Delta v}{\Delta t}$ ✓
 $= \frac{0-2,5}{100-80}$ ✓
 $= -0,0625$

Physical Sciences Common Test March 2014:

The Role and Risks of Assumptions in Physical Science Modelling Allan Anforth, 2014-10-11 This book questions the extent to which some physical scientists may have unintentionally misused the English language to varying degrees in arriving at theories that are presented to the world as being statements of fact about the universe The book focuses primarily on large and small scale extremes i e cosmological theories and quantum theories It deals with the core concepts of time and space as they are presented in the theories under consideration As a demonstration of the sensitivity of the outcome of physical modelling to the assumptions made the book presents an alternative cosmological model based on some altered physical assumptions that see the much vaunted inconsistency between General Relativity and Quantum Field Theory disappear Chemical news and Journal of physical science ,1876 A Review of the Next Generation Air Transportation System National Research Council, Division on Engineering and Physical Sciences, Computer Science and Telecommunications Board, Committee to Review the Enterprise Architecture, Software Development Approach, and Safety and Human Factor Design of the Next Generation Air Transportation System, 2015-06-17 The Next Generation Air Transportation System's NextGen goal is the transformation of the U S national airspace system through programs and initiatives that could make it possible to shorten routes navigate better around weather save time and fuel reduce delays and improve capabilities for monitoring and managing of aircraft A Review of the Next Generation Air Transportation provides an overview of NextGen and examines the technical activities including human system design and testing organizational design and other safety and human factor aspects of the system that will be necessary to successfully transition current and planned modernization programs to the future system This report assesses technical cost and schedule risk for the software development that will be necessary to achieve the expected benefits from a highly automated air traffic management system and the implications for ongoing modernization projects The recommendations of this report will help the Federal Aviation Administration anticipate and respond to the challenges of implementing NextGen Governing Agricultural Sustainability Phil Macnaghten, Susana Carro-Ripalda, 2015-06-26 Although GM crops are seen by their advocates as a key component of the future of world agriculture and as part of the solution for world poverty and hunger their uptake has not been smooth nor universal they have been marred by controversy and all too commonly their regulation has been challenged as inadequate even biased This book aims to understand these dynamics examining the impacts of GM crops in diverse contexts and their potentials to contribute to sustainable agricultural futures Part 1 draws on research from three global rising powers Brazil India and Mexico exploring the views of scientists farmers and publics Using a diverse array of ethnographic and qualitative methodologies the book examines the dynamics that have underpinned the controversy in three diverse geo political contexts the manner in which dominant institutional framings have been closely aligned with the interests of powerful elites and the multiple ways in which these have been resisted through local symbolic and material practices Part 2 comprises a series of

short comment pieces from 11 leading social and natural scientists responding to the question of how to develop a policy framework for the responsible innovation of sustainable culturally appropriate and socially just agricultural GM technologies This innovative book offers new insights for researchers and postgraduates in Science and technology studies Agro ecology and Environmental Studies Development studies Anthropology Human Geography Sociology Political Science Public Administration Latin American studies and Asian studies

Epistemology of Experimental Gravity - Scientific Rationality Nicolae Sfetcu, 2019 The evolution of gravitational tests from an epistemological perspective framed in the concept of rational reconstruction of Imre Lakatos based on his methodology of research programmes Unlike other works on the same subject the evaluated period is very extensive starting with Newton's natural philosophy and up to the quantum gravity theories of today In order to explain in a more rational way the complex evolution of the gravity concept of the last century I propose a natural extension of the methodology of the research programmes of Lakatos that I then use during the paper I believe that this approach offers a new perspective on how evolved over time the concept of gravity and the methods of testing each theory of gravity through observations and experiments I argue based on the methodology of the research programmes and the studies of scientists and philosophers that the current theories of quantum gravity are degenerative due to the lack of experimental evidence over a long period of time and of self immunization against the possibility of falsification Moreover a methodological current is being developed that assigns a secondary unimportant role to verification through observations and or experiments For this reason it will not be possible to have a complete theory of quantum gravity in its current form which to include to the limit the general relativity since physical theories have always been adjusted during their evolution based on observational or experimental tests and verified by the predictions made Also contrary to a widespread opinion and current active programs regarding the unification of all the fundamental forces of physics in a single final theory based on string theory I argue that this unification is generally unlikely and it is not possible anyway for a unification to be developed based on current theories of quantum gravity including string theory In addition I support the views of some scientists and philosophers that currently too much resources are being consumed on the idea of developing quantum gravity theories and in particular string theory to include general relativity and to unify gravity with other forces as long as science does not impose such research programs
