The End of Aging Dr. Daniela Farkas DPM MS HHP,2022-11-07 Living happily ever after was a dream and hope of people throughout ages from young to old It was an aspiration and a goal present in children s stories religious beliefs and hopeful wishes We live in a time when scientific breakthroughs in medicine biology epigenetics and other branches of science accumulated knowledge to convert the healthy long living dream into reality Specifically understanding the laws that govern the cells tissue and organs made possible this very bold statement that age and in the future ultimately mortality could be conquered Those discoveries bring a lot of new challenges to the way we govern ourselves and the mindset in the culture we live in The understanding we had about diet sleep exercise mental attitude and risky behaviors are still very important and needed but not sufficient The next barrier consists in reversing and stopping the process of aging Aging is a very costly disease and there is nothing desirable about any condition associated with aging or sickness To live a long and sick life is a curse not a blessing We are striving for a healthy long life full of vigor achievements and excitements This book explains the seven pillars that age and dying are resting on and ways to prevent every one of them from manifesting If we understand how we age and why we can intervene at different points to prevent and break this cycle The natural cell cycle of age and atrophy of cells is discussed Different pathways that lead to cancers zombie or senescent cells are discussed with ways to prevent them Then the powerhouse of the cell is discussed in detail with ways of strengthening and protecting it This powerhouse is viewed by many scientists as the kernel where diseases do originate Also toxin accumulation inside the cells is discussed with ways of helping the cells get rid of the overload Toxin accumulation between the cells is discussed as well as the relationship between the autoimmune disease and gut health Different plant involvement in our health and diseases in the forms of lectins are also discussed The space between cells and the health of some organs that do assist in the detoxification process are discussed together with water roles Aging could be conquered by a series of steps It could be viewed as maintenance offered to a very valuable machinery Some of the needed ingredients for the cells to function optimally in the form of vitamins minerals polyphenols amines and other substances are also given Staying young and healthy does not consist in a magic pill It consists of a series of steps taken daily that preserve and strengthen the cells It is the habit of daily choices taken that confer excellent results Excellence is never an accident It is always the result of high intention sincere effort and intelligent execution It represents the wise choice of many alternatives choice not chance determines your destiny Aristotle
