Basic Fluid Mechanics and Hydraulic Machines Zueb Husain, Zulkifly Abdullah, Zainal Alimuddin, 2009-02-27

Following a concise overview of fluid mechanics informed by numerous engineering applications and examples this reference presents and analyzes major types of fluid machinery and the major classes of turbines as well as pump technology It offers professionals and students in hydraulic engineering with background concepts as well as practical coverage of modern turbine technologies fully explaining the advantages of both steam and gas turbines Description design and operational information for the Pelton Francis Propeller and Kaplan turbines are provided as are outlines of various types of power plants It provides solved examples chapter problems and a thorough case study *Bio-Inspired Materials* Ulisses Targino Bezerra, Heber Sivini Ferreira, Normando Perazzo Barbosa, 2019-04-16 Nature has provided opportunities for scientists to observe patterns in biomaterials which can be imitated when designing construction materials Materials designed with natural elements can be robust and environment friendly at the same time Advances in our understanding of biology and materials science coupled with the extensive observation of nature have stimulated the search for better accommodation compression of materials and the higher organization reduction of mechanical stress in man made structures Bio Inspired

Materials is a collection of topics that explore frontiers in 3 sections of bio inspired design i bionics design ii bio inspired construction and iii bio materials Chapters in each section address the most recent advances in our knowledge about the desired and expected relationship between humans and nature and its use in bio inspired buildings Readers will also be introduced to new concepts relevant to bionics biomimicry and biomimetics Section i presents research concepts based on information gained from the direct observation of nature and its applications for human living Section ii is devoted to artificial construction of the Earth This section addresses issues on geopolymers materials that resemble the structure of soils and natural rocks procedures that reduce damage caused by earthquakes in natural construction the development of products from vegetable resins and construction principles using bamboo The last section takes a look into the future towards the improvement of human living conditions Bio Inspired Materials offers readers having a background in architecture civil engineering and systems biology a new perspective about sustainable building which is a key part of addressing the environmental concerns of current times
