going on in today's worlds of art and science Stanford Peter C. Allen,1980 Proton Therapy and Radiosurgery Hans Breuer,Berend J. Smit,2013-04-17 The book is divided into two parts Part I deals with the relevant physics and planning algorithms of protons H Breuer and Part II with the radiobiology radiopathology and clinical outcomes of proton therapy and a comparison of proton therapy versus photon therapy BJ Smit Protons can be used for radiosurgery and general radiotherapy Since proton therapy was first proposed in 1946 by Wilson about sixteen facilities have been built globally Only a very few of these have isocentric beam delivery systems so that proton therapy is really only now in a position to be compared directly by means of randomised clinical trials with modern photon radiotherapy therapy systems both for radiosurgery and for general fractionated radiotherapy Three dimensional proton planning computer systems with image fusion image of computerised tomography CT magnetic resonance registration capabilities imaging MRI stereotactic angiograms and perhaps positron emission tomography PET are essential for accurate proton therapy planning New planning systems for spot scanning are under development Many of the older comparisons of the advantageous dose distributions for protons were made with parallel opposing or multiple co planar field arrangements which are now largely obsolete New comparative plans are necessary once more because of the very rapid progress in 3 D conformal planning with photons New cost benefit analyses may be needed Low energy about 70 MeV proton therapy is eminently suitable for the treatment of eye tumours and has firmly established itself as very useful in this regard **Biennial Report** University of Colorado Boulder.
