Current Perspectives on the Value, Teaching, Learning, and Assessment of Design in STEM Education Jeffrey Buckley,Eva Hartell,Nicolaas Blom,2023-08-25 Design is a central activity within Science Technology Engineering and Mathematics STEM education

Within enacted practice design can feature within intended learning outcomes for example in learning to design and it can feature within pedagogical methodologies for example by learning through design Often holding differing disciplinary interpretations such as design as cyclical problem solving iterative design conceptual design or design with or without make understanding the educational merits of the ill defined and open nature of authentic designerly activity is paramount This Research Topic sets out to gain a more nuanced understanding of the value and role s of design within STEM educational contexts This Research Topic focuses on design within STEM educational contexts particularly in terms of teaching learning and assessment The aim is to contribute to the evidential basis which can be used to guide the incorporation of design into educational practice The topic has two central research objectives The first is to generate evidence regarding what design is in STEM education For example is the ability to design a singular or manifold construct Is the capacity to design or are factors of this ability both learnable and teachable How transferable is designerly knowledge between contexts How do different disciplinary contexts influence the interpretation of design The second is to further our understanding of how best to incorporate design within STEM education contexts For example how much emphasis should be placed on learning to or through design in school How should design be assessed within formal education Where and when is design best incorporated into education In posing these questions the goal of this research topic is to provide scholarly discourse which supports critical reflection and the challenging of assumptions regarding design in education

Physics and the Environment Kyle Forinash,2017-07-05 Physics and the Environment directly connects the physical world to environmental issues that the world is facing today and will face in the future It shows how the first and second laws of thermodynamics limit the efficiencies of fossil fuel energy conversions to less than 100% while also discussing how clever technologies can enhance overall performance It also extensively discusses renewable forms of energy their physical constraints and how we must use science and engineering as tools to solve problems instead of opinion and politics Dr Kyle Forinash takes you on a journey of understanding our mature and well developed technologies for using fossil fuel resources and how we are unlikely to see huge gains in their efficiency as well as why their role in climate change

ought to be an argument for their replacement sooner rather than later He also discusses the newest technologies in employing renewable resources and how it is important to understand their physical constraints in order to make a smooth transition to them An entire chapter is dedicated to energy storage a core question in renewable energy as well as another chapter on the technical issues of nuclear energy The book ends with a discussion on how no environmental solution no matter how clever from a technical aspect will succeed if there are cheaper alternatives even if those alternatives have undesirable features associated with them Home Learning Year by Year, Revised and Updated Rebecca Rupp, 2020-01-21 A comprehensive guide to designing homeschool curriculum from one of the country's foremost homeschooling experts now revised and updated Homeschooling can be a tremendous gift to your children a personalized educational experience tailored to each kid's interests abilities and learning styles But what to teach and when and how Especially for first time homeschoolers the prospect of tackling an annual curriculum can be daunting In Home Learning Year by Year Rebecca Rupp presents comprehensive plans from preschool through high school covering integral subjects for each grade with lists of topics commonly presented at each level recommended resource and reading lists and suggestions for creative alternative options and approaches Included along with all the educational basics are techniques and resources for teaching everything from philosophy to engineering as well as suggestions for dealing with such sensitive topics as sex education Now revised throughout with all new updates featuring the most effective and up to date methods and reading guides to homeschool your child at all ages Home Learning Year by Year continues to be the definitive book for the homeschooling parent
