Ludicrous Edward Niedermeyer, 2019-08-20 Tesla is the most exciting car company in a generation but can it live up to the hype Tesla Motors and CEO Elon Musk have become household names shaking up the staid auto industry by creating a set of innovative electric vehicles that have wowed the marketplace and defied conventional wisdom The company's market valuation now rivals that of long established automakers and to many industry observers Tesla is defining the future of the industry But behind the hype Tesla has some serious deficiencies that raise questions about its sky high valuation and even its ultimate survival Tesla's commitment to innovation has led it to reject the careful zero defects approach of other car manufacturers even as it struggles to mass produce cars reliably and with minimal defects While most car manufacturers struggle with the razor thin margins of mid priced sedans Tesla's strategy requires that the Model 3 finally bring it to profitability even as the high priced Roadster and Model S both lost money And Tesla's approach of continually focusing on the future even as commitments and deadlines are repeatedly missed may ultimately test the patience of all but its most devoted fans In Ludicrous journalist and auto industry analyst Edward Niedermeyer lays bare the disconnect between the popular perception of Tesla and the day to day realities of the company and the cars it produces Blending original reporting and never before published insider accounts with savvy industry analysis Niedermeyer tells the story of Tesla as it's never been told before with clear eyes objectivity and insight

How Your Brain Works Greg Gage, Tim Marzullo, 2022-10-25 Discover the hidden electrical world inside your nervous system using DIY hands on experiments for all ages No MD or PhD required The workings of the brain are mysterious What are neural signals What do they mean How do our senses really sense How does our brain control our movements What happens when we meditate Techniques to record signals from living brains were once thought to be the realm of advanced university labs but not anymore This book allows

anyone to participate in the discovery of neuroscience through hands on experiments that record the hidden electrical world beneath our skin and skulls In *How Your Brain Works* neuroscientists Greg Gage and Tim Marzullo offer a practical guide accessible and useful to readers from middle schoolers to college undergraduates to curious adults for learning about the brain through hands on experiments Armed with some DIY electrodes readers will get to see what brain activity really looks like through simple neuroscience experiments Written by two neuroscience researchers who invented open source techniques to record signals from neurons muscles hearts eyes and brains *How Your Brain Works* includes more than forty five experiments to gain a deeper understanding of your brain Using a homemade scientific instrument called a SpikerBox readers can see how fast neural signals travel by recording electrical signals from an earthworm Or turning themselves into subjects readers can strap on some electrode stickers to detect the nervous system in their own bodies Each chapter begins by describing some phenomenology of a particular area of neuroscience then guides readers step by step through an experiment and concludes with a series of open ended questions to inspire further investigation Some experiments use invertebrates such as insects and the book provides a thoughtful framework for the ethical use of these animals in education *How Your Brain Works* offers fascinating reading for students at any level curious readers and scientists interested in using electrophysiology in their research or teaching

Example Experiments

How fast do signals travel down a neuron The brain uses electricity but do neurons communicate as fast as lightning inside our bodies In this experiment you will make a speed trap for spikes Can we really enhance our memories during sleep Strap on a brainwave reading sweatband and test the power of cueing up and strengthening memories while you dream away Wait that s my number Ever feel that moment of excitement when you see your number displayed while waiting for an opening at the counter In this experiment you will peer into your brainwaves to see what happens when the unexpected occurs and how the brain gets your attention Using hip hop to talk to the brain Tired of simply reading the electricity from the brain Would you like to write to the nervous system as well In this experiment you will use a smartphone and hack a headphone cable to see how brain stimulators used in treating Parkinson s disease really work How long does it take the brain to decide Using simple classroom rulers and a clever technique readers can determine how long it takes the brain to make decisions
