Materials Ulisses Targino Bezerra, Heber Sivini Ferreira, Normando Perazzo Barbosa, 2019-04-16 Nature has provided
opportunities for scientists to observe patterns in biomaterials which can be imitated when designing construction materials
Materials designed with natural elements can be robust and environment friendly at the same time Advances in our
understanding of biology and materials science coupled with the extensive observation of nature have stimulated the search
for better accommodation compression of materials and the higher organization reduction of mechanical stress in man made
structures Bio Inspired Materials is a collection of topics that explore frontiers in 3 sections of bio inspired design i bionics
design ii bio inspired construction and iii bio materials Chapters in each section address the most recent advances in our
knowledge about the desired and expected relationship between humans and nature and its use in bio inspired buildings
Readers will also be introduced to new concepts relevant to bionics biomimicry and biomimetics Section i presents research
concepts based on information gained from the direct observation of nature and its applications for human living Section ii is
devoted to artificial construction of the Earth This section addresses issues on geopolymers materials that resemble the
structure of soils and natural rocks procedures that reduce damage caused by earthquakes in natural construction the

development of products from vegetable resins and construction principles using bamboo The last section takes a look into the future towards the improvement of human living conditions Bio Inspired Materials offers readers having a background in architecture civil engineering and systems biology a new perspective about sustainable building which is a key part of addressing the environmental concerns of current times
