Successive crises have tainted financial markets in recent years. Calls to restore trust in finance have been particularly pressing given trust's crucial role as lubricant in global financial engines. Nonetheless years after the global financial crisis trust in financial markets remains both tenuous and controversial. This book explores PR in financial markets posing a fundamental question about PR professionals as would be trust strategists. If PR promotes its expertise in building and restoring trust how can it ignore its potential role in losing trust in the first place. Drawing on examples from state finance international lending agencies trade bodies financial institutions and consumer groups in mature and emerging financial centres this book explores the wide ranging role of PR in
