Financial Crisis, Austerity, and Electoral Politics Pedro Magalhães, 2017-10-02 This book examines the domestic electoral consequences of the economic and financial crisis in Europe particularly in those countries where the crisis manifested itself more devastatingly the Southern European countries of Greece Italy Portugal and Spain as well as Iceland and Ireland On the surface the electoral consequences of the crisis seem largely similar having resulted in these countries in large electoral losses for incumbents as the most elementary versions of economic voting theory would have us

expect However behind this fundamental similarity important differences emerge Whilst in some cases on the basis of post election surveys it is possible to see that the crisis elections followed a previous pattern of performance oriented voters with no major changes either in known predictors of electoral choices or in basic party system properties other elections brought the emergence of new parties new issues and cleavages altering patterns of political competition By examining these different outcomes by comparing the crisis elections with previous ones this book takes into account their timing relative to different stages of crisis It also scrutinises party strategies and campaign dynamics particularly as governments attempted and sometimes succeeded in framing events and proposals so as to apportion responsibility for economic outcomes This book was originally published as a special issue of the Journal of Elections Public Opinion and Parties

**Social Mobility in Developing Countries** Vegard Iversen,Anirudh Krishna,Kunal Sen,2021-12-17 Social mobility is the hope of economic development and the mantra of a good society There are disagreements about what constitutes social mobility but there is broad agreement that people should have roughly equal chances of success regardless of their economic status at birth Concerns about rising inequality have engendered a renewed interest in social mobility especially in the developing world However efforts to construct the databases and meet the standards required for conventional analyses of social mobility are at a preliminary stage and need to be complemented by innovative conceptual and methodological advances If forms of mobility have slowed in the West then we might be entering an age of rigid stratification with defined boundaries between the always haves and the never haves which does not augur well for social stability Social mobility research is ongoing with substantive findings in different disciplines typically with researchers in isolation from each other A key contribution of this book is the pulling together of the emerging streams of knowledge Generating policy relevant knowledge is a principal concern Three basic questions frame the study of diverse aspects of social mobility in the book How to assess the extent of social mobility in a given development context when the datasets by conventional measurement techniques are unavailable How to identify drivers and inhibitors of social mobility in particular developing country contexts How to acquire the knowledge required to design interventions to raise social mobility either by increasing upward mobility or by lowering downward mobility

**Energy, Bio Fuels and Development** Edmund Amann, Werner Baer, Don Coes, 2011-03-07 This collection examines the important and topical issue of the economic social and environmental implications of concerted attempts to diversify energy sources away from fossil fuels The book expertly examines this issue by focussing on the contrasting experiences of two major economies one developed and the other a rapidly expanding emerging market Energy Bio Fuels and Development evaluates the experience of Brazil with elements of that of the US highlighted for the purpose of comparison A key area of concern surrounds the causes and consequences of the contrasting routes to biofuel production represented by sugar cane in Brazil and corn in the US The book also places the recent biofuels drive in perspective by discussing the broader energy policy context The book shows the complexity and interdependence of the issues involved in moving a society reliant on non renewable energy sources to one based on alternative sources of energy The key conclusion to emerge is that Brazil in pursuing a flexible mix of fossil fuels and bio fuels has greatly diminished its exposure to exogenous energy shocks The US experience in particular its development of corn based ethanol has been more problematic though by no means without successes It is argued that bio fuels should not be seen as a panacea There are clear limits to the efficiency and cost effectiveness of current biofuel production technologies while there remain concerns surrounding potentially adverse effects on food production and rural livelihoods This book should be an excellent resource for students focussing on economic development particularly in the areas of energy biofuels rural development and food supply

**Water Resources Management in the People's Republic of China** Xuetao Sun, Robert Speed, Dajun Shen, 2013-09-13 Chinese water resource managers face a challenge that is both immense and unique They must balance limited water supplies against the needs of the world s largest population demands for rapid economic growth with calls for improved environmental management and the desire for a market based approach to the allocation of water with a history of State ownership and strict government control of all resources In China changes are occurring in water resources management that are representative of many of the fundamental changes occurring within Chinese society on issues such as property rights community participation improved environmental management and the shift towards market based decision making This

book describes the development of a water rights system in the People's Republic of China. It covers different aspects of water resources management in China including water planning, the provision of environmental flows, urban water management and irrigation district management and examines how these are being addressed through a rights-based approach. The book includes several detailed examples of the Chinese application of water rights as they address the diverse challenges of different basins across China. This book previously appeared as a special issue of the International Journal of Water Resources Development.
