October November 2014 Paper 2 Business Studies Marking Scheme:

The Football Pools and the British Working Class Keith Laybourn, 2022-07-22 This book is the first national study of the football pools in Britain which examines the politics and culture of the gambling on the football pools. It charts the rise of the football pools focusing upon its rapid growth from the 1920s and its prolonged decline in British culture from the 1990s partly as a result of the National Lottery. The book explores how this new gambling activity became a significant leisure opportunity for the working class, a way to feel that the individual skill of the punter could lead to the winning of some life-changing jackpot cheque being presented by a sporting personality of celebrity. Dominated by Littlewoods and other large commercial companies, the weekly filling in of the coupons was considered to be a safe form of investment guaranteed by the integrity of the pool companies rather than some seedy gambling operation. *The Football Pools and the British Working Class* looks at different elements of the football pools: from what attracted people to this form of gambling to how the industry developed and adjusted to the suspension of the football fixtures in 1936 and the bad winter of 1962-3. Above all, it examines the deep hostility that surrounded the filling in of the football pools arising from the National Anti Gambling League, religious groups, the football authorities and MPs. This book will appeal to all those interested in the history of British football and 20th century British working class culture.

The Allocation of Multinational Business Income: Reassessing the Formulary Apportionment Option Richard Krever, 2020-02-20 *The Allocation of Multinational Business Income: Reassessing the Formulary Apportionment Option* Edited by Richard Krever application of formulary apportionment in specific sectors such as digital enterprises and the banking industry; the political economy of establishing and maintaining a successful formulary apportionment regime; formulary apportionment proposals for Europe; the role of traditional tax criteria such as economic efficiency, fairness, ease of administration and robustness to avoidance; and incentive compatibility determining which parts of a multinational group are included in a formulary apportionment unit and whether innovative profit split methodologies such as those developed by China are shifting traditional arm's length methods to a quasi formulary apportionment system. Providing a comprehensive understanding of all aspects of the formulary apportionment option, this state of the art summary of history, current practice, proposals and prospects in the ongoing debate over arm's length versus formulary apportionment methodologies will be welcomed by practitioners, policy makers and academics concerned with international taxation, all of whom will gain an understanding of the case put forward by proponents for adoption of formulary apportionment in Europe and globally and the counter arguments they face. Readers will acquire a better understanding of the implications of formulary apportionment and its central role in the current debate about the future of international taxation rules, providing all the intellectual ammunition needed to carefully re-examine one of the ideas traditionally considered as apocryphal by the OECD and to a significant portion of the tax professional community. Natural Monopolies in Digital Platform Markets

Francesco Ducci,2020-07-23 Competition policy debates on digital platform markets are often premised on the idea that market fragmentation and the standard forces of competition and entry may provide a potential solution to excessive concentration and market power In this work Francesco Ducci provides readers with a different perspective based on the theoretical lens of natural monopoly Ducci explores this framework through the development of three case studies on horizontal search e commerce marketplaces and ride hailing platforms investigating the strength and limit of potential and often heterogeneous sources of natural monopoly at play in each industry Building on these case studies the book then derives from the application of the natural monopoly framework general policy implications for digital industries by identifying the respective institutional flaws and shortcomings of ex ante and ex post approaches to market power as one of the central challenges in digital platform markets
