State Board of Education,1925 The Politics of Knowledge Richard K.

Laird,2019-05-03 Whether or not the U S is in decline can be debated but there is evidence that its political system is becoming less able to solve major problems This is in part because loyalty to a belief or an ideology may be taking priority over learning how to understand the problems This work attempts to revitalize the importance of learnability by reviewing some fundamentals of who we are how the system works and why learning is difficult Humans driven by opinions and perceptions tend to discount politics similar to the way they might discount science yet it was the study of science and politics that brought much of mankind to remarkably higher standards of living Government and the economic system it implemented was initially designed for the purpose of channeling self interests into public benefits Understanding what an inclusive political culture is or why there is a Constitution for example could be useful toward restoring the credibility of our central political organization the core of society s stability and development We are losing respect for our government s decision making ability but in a democracy citizens must be held more accountable for who their government is The hypothesis is that if more humans are more learnable we will increase the possibilities for finding the best solutions to big problems
