have been investigated namely in music and musical institutions specific geographical communities education and in health and well being This conceptual framework provides the rationale for the structure of the Handbook The book is divided into seven main sections The first Sociological discursive and narrative approaches includes several general theoretical accounts of musical identities from this perspective as well as some more specific investigations The second and third main sections deal in depth with two of the three psychological topics described above namely the development of and individual differences in musical identities The fourth fifth and sixth main sections pursue three of the real life contexts identified above namely Musical institutions and practitioners Education and Health and well being The seventh and final main section of the Handbook Case studies includes chapters which look at particular musical identities in specific times places or contexts The multidisciplinary range and breadth of the Handbook s contents reflect the rapid changes that are taking place in music in digital technology and in their role in society as a whole such that the study of musical identity is likely to proliferate even further in the future
