A recession is defined to be a period of two quarters of negative GDP growth Thus a recession is a national or world event by definition And statistical aberrations or one time events can almost never create a recession e g if there were to be

movement of economic activity measured or real around Jan 1 2000 it could create the appearance of only one quarter of

negative growth For a recession to occur the real economy must decline **Chilton's Repair & Tune-up Guide, Pontiac**
