

Population Distributions

How does population distribution affect the outcome?

Why?

Alaska's population is 0.7 million, and it is the largest state in the United States per mile² – proportionally it is only 17th, 18th people miles per square mile. In Alaska, Texas, New Jersey is one of the most densely populated states in the population of nearly 4 million, less than 1/10th of the 40 million total land area are concentrated in the northeast. What are the reasons for this high population density in the northeast and what effect does this concentration have on the outcome?
