Intervention (RTI) Models in Secondary Education Epler, Pam, 2015-07-25 Response to Intervention RTI is an intervention model designed to assist all students regardless of their academic ability. It seeks to assist students who are struggling in academics by providing them with targeted assistance in the form of tutoring, pull out services, and differentiated classroom instruction. Examining Response to Intervention RTI Models in Secondary Education highlights the application of the RTI model to secondary schools through instructional strategies and real world examples of how this model can be used at the middle and high school levels. Through a series of informative and timely chapters written by global educational specialists, this publication is ideally designed for use by middle and high school teachers and school administrators, as well as professors and students in upper level Educational Leadership and Secondary Education programs.

Assessment of Russian as a Foreign Language Dmitrii Pastushenkov, Liya Zalaltdinova, 2025-07-29 Assessment of Russian as a Foreign Language: Unlocking Proficiency explores recent research methodologies and practices in Russian language assessment, offering a comprehensive guide for teachers, researchers, and administrators. The volume examines learner-centered and proficiency-oriented assessment alongside technological innovations, including automated proficiency assessment and constructionist approaches. The book discusses emerging trends, including social justice-oriented assessment, e.g., feminist approaches and ungrading, positive psychology, e.g., authorized cheat sheets, and technological integration, including game-based assessments. This volume provides a wealth of resources to advance Russian language assessment, addressing a critical need in the field. It serves as an invaluable resource enabling novice and experienced teachers to refine instructional strategies to support researchers in exploring advanced assessment techniques and helping administrators to enhance the overall learning experience.

Exam Literacy Jake Hunton, 2018-08-13 In *Exam Literacy*, A guide to doing what works and not what doesn't to better prepare students for exams. Jake Hunton focuses on the latest cognitive research into revision techniques and delivers proven strategies which actually work. Foreword by Professor John Dunlosky. Read, highlight, reread, repeat. If such a revision cycle sounds all too wearily familiar, you and your students need a better route to exam success. And in light of the recent decision to make all subjects at GCSE linear, so that students will be tested in one-off sittings, it will be even more important that students are well equipped to acquire and recall key content ahead of their exams. In this wide-ranging guide to effective exam preparation, Jake Hunton casts a careful eye over a wide range of research into revision techniques and details the strategies which have been proven to deliver the best results. With plenty of practical suggestions and subject-specific examples, *Exam Literacy* provides teachers with user-friendly advice on how they can make the content they cover stick and shares up-to-date evidence-based information on the nature of learning and the various types of memory. How to improve students' retention of knowledge and recall of content. Why popular revision techniques such as rereading, highlighting, and summarising may not be as effective as you think. How revision strategies that have been identified as being more effective, such as interleaving, elaborative interrogation, self-explanation, and retrieval practice, can be embedded into

day to day teaching How students can be encouraged to make use of these winning strategies when revising independently
