D223 Keypad Installation Instructions

Description

The D223 Keypad is a low-profile, surface-mount, three-wire unit for use with the Radionics D2212 Control/Communicator. The D223 features an illuminated keypad, a backlit two-line LCD text display, an armed status indicator, three programmable emergency keys, and a built-in sounder that emits several distinct tones.

The control/communicator supplies all power and data requirements for the D223 using a simple three-wire connection. Depending on the panel's available auxiliary power, you can install up to eight D223 Keypads in one system.

You can program custom text locally using either the D5200 Programmer or keypad programming. If using the D5200, be sure to lock the panel's standby pin down **before** connecting the programmer. You can program text remotely using the D5300, RAM II.

The Display

The D223 Keypad continuously displays the latest status conditions of the security system. It takes 15 seconds after the program has been received for the new text to replace the old text. When a series of events occur that affect the system, the D223 displays each event by priority, for example, the D223 displays alarms before point faults.

The LCD display is normally illuminated constantly. You can choose to make it illuminate only after a key is pressed. With this option, the display and backlights extinguish after approximately 20 seconds. Press and hold the **CLEAR** key for five seconds to turn this feature on or off.

The Keys

The D223 Keypad has a **CLEAR** key, **☛** key, three emergency keys labeled A, B, and C, and number keys from 0 to 9. These keys are used to enter functions and personal passcodes into the panel.

Response Tones

The D223 Keypad contains a sounder used to announce several system conditions. You can disable the sounder if you choose.

Installing the Keypad

Select a Mounting Location - Do not locate the D223 in areas of extreme cold for example, in an uninsulated building, refrigerated areas, outdoors, or in areas where the temperature can drop below 32°. Do not mount the keypad in a location exposed to direct sunlight. Direct sunlight makes the display less visible and may also damage the keypad components.
