Wennersten, Denise Robbins, 2017-06-12 Deals masterfully with a neglected crisis: how climate change is driving migration. The work broaches solutions, both practical and political. Christopher E. Goldthwait, former US Ambassador. With global climate change upon us, it is imperative to start thinking about the massive numbers of people who will be displaced by environmental crises. The rise in sea levels alone will account for hundreds of millions of refugees around the globe. In *Rising Tides*, John R. Wennersten and Denise Robbins face the difficult questions that will have to be answered: How will people be relocated and settled? Is it possible to offer environmental refugees temporary or permanent asylum? Will these refugees have any collective rights in the new areas they inhabit? And lastly, who will pay the costs of all the affected countries during the process of resettlement? Offering an essential, continent-by-continent look at these dangers, *Rising Tides* is a passionately argued, well-documented wake-up call on the dire, current and undeniable human fallout from climate change. Looking behind the headlines, it connects
