

## 1. Install the bracket using the template

The Anti-Tip bracket is packaged with a template. The instructions include information necessary to complete the installation. Read and follow the instructions on the sheet (template) for range installation.

## 2. Level the range

Level the range by adjusting the leveling legs with a wrench.

## 3. Check your adjustments

Use a level to check your adjustments. Place the level diagonally on the oven rack or surface cooktop, and confirm the range is level in the two directions shown below.

- A. Check direction 1.
- B. Check direction 2.

If the level indicates that the range is not level, adjust the leveling legs with a wrench.

### CAUTION

For your safety, do not attempt to modify or straighten front legs. Front leveling legs on the range are designed to be slanted to prevent accidental tipping.

## Finalizing the installation

- Move range close enough to the opening to plug into the receptacle.
- Slide the range into position ensuring that the rear left (or rear right) leg slides under the Anti-Tip bracket.
- Carefully tip the range forward to insure that the Anti-Tip bracket engages the Anti-Tip bracket and prevents tip-over.
- Turn on the electrical power. Check the range for proper operation as described in the user manual.
