PHARMACOLOGY

Ocurest / Ocurest-AH contains a combination of a decongestant and a vasoconstrictor for the relief of ocular symptoms due to allergy and inflammation of a non-infectious origin. Phenylephrine causes decongestion in the eye by constricting blood vessels. It also enlarges the pupil and it reduces the amount of fluid in the eye by reducing the production and increasing the drainage.

Naphazoline constricts the vascular system of the conjunctiva. It is presumed this effect is due to direct action of the drug upon the β -adrenergic receptors of the vascular smooth muscle. Its action is characterised by a long duration. Menthol and camphor provide cooling and soothing effect.

Chlorpheniramine maleate in **Ocurest-AH** binds to the H1-histamine receptors, thus blocks the actions of histamine. The antihistamine / decongestant combination in **Ocurest-AH** alleviates itching, hyperemia, chemosis, lid swelling and tearing.
