Comparative Encounters Between Artaud, Michaux and the Zhuangzi Xiaofan Amy Li, 2017-12-02 The encounter between different minds and perspectives across time and space has always haunted the literary and philosophical imagination Just such an encounter is staged and played out in this comparative study which connects the twentieth century Francophone writers Antonin Artaud 1896 1948 and Henri Michaux 1899 1984 with the ancient Chinese text Zhuangzi c 4th 3rd century BCE These disparate texts are bridged by questions that draw them into close dialogue how can Artaud and Michaux who read about and admired ancient Chinese literature and culture be rethought through certain philosophical concerns that the Zhuangzi raises If the points of conceptual intersection focus on rationality cosmology and ethics what can they tell us about these important issues By imagining constructing and developing this thought encounter Li re envisages Artaud Michaux and the Zhuangzi through the kaleidoscope of comparative interpretation juxtaposing and recombining ideas and contexts to form new patterns and meanings Xiaofan Amy Li is Junior Research Fellow in Comparative Literature and Translation at St Anne's College Oxford University

Constructing Urban Space with Sounds and Music Ricciarda Belgiojoso, 2016-05-23 While we are used to looking around us we are less used to listening to what happens around us And yet the noises we produce reveal our way of life and learning to master them is a necessity This book aims at drawing the reader's attention to the sound of the urban environment The topic is by its very nature complex as it involves sounds and noises urban space and social activities Using an interdisciplinary approach it examines a heterogeneous selection of experimentations from the domains of music art and architecture Significant case studies of pieces of music public art works and scientific research in the field of urban planning are analyzed investigating the methods that have been adopted and the aural processes that have been generated It then uses the findings to

reconstruct the underlying theories and practices and to show what might be drawn from these procedures applied to urban planning The overall objective is to learn to build and enrich space with sound arguing that there is a need to reconsider architecture and urban planning beyond building and to look to the world of the arts and other disciplines In doing so the book guides the reader toward a sensorial architecture and more generally toward consciously creating environmental architecture which is sustainable and connects with art and which diffuses a culture of sound

Ecologies in Southeast Asian Literatures: Histories, Myths and Societies Chi P. Pham, Chitra Sankaran, Gurpreet Kaur, 2019-09-09 Ecocriticism in relation to the Southeast Asian region is relatively new So far John Charles Ryan's Ecocriticism in Southeast Asia is the first book of its kind to focus on the region and its literature to give an ecocritical analysis that volume compiles analyses of the eco literatures from most of the Southeast Asian region providing a broad insight into the ecological concerns of the region as depicted in its literatures and other cultural texts This edited volume furthers the study of Southeast Asian ecocriticism focusing specifically on prominent myths and histories and the myriad ways in which they connect to the social fabric of the region Our book is an original contribution to the expanding field of ecocriticism as it highlights the mythohistorical basis of many of the region's literatures and their relationship to the environment The varied articles in this volume together explore the idea of nature and its relationship with humans The always problematic questions that surround such explorations such as why do we regard nature as external or how is humankind a continuum with nature emerge throughout the volume either overtly or implicitly As Pepper 1993 points out what Karl Marx referenced as first or external nature gave rise to humankind But humanity worked on this first nature to produce a second nature the material creations of society plus its institutions ideas and values Pepper 108 Thus our volume constantly negotiates this field of ideas and belief systems in diverse ways and in various cultures attempting to relate them to the current ecological predicaments of ASEAN It will likely prove an invaluable resource for scholars and students of ecocriticism and more broadly of Southeast Asian cultures and literatures
